Benefits of VLR Dashboard

Living data lab

Plans and Priorities Analysis

Localization of SDG indicators

Continuous monitoring and reporting

Increased Transparency and Accountability

VLR Dashboard in Use

The screenshot displays the VLR Dashboard website. At the top left is the Nakuru County logo with the tagline 'COURTY BY UNLIMITED OPPORTUNITIES'. The navigation menu includes 'Home', 'SDGs', 'IDEP', 'Vision 2050', 'Resources', 'Support', and 'About'. The main banner features a large image of flamingos in a wetland, with the text 'Tracking Resilience, Empowerment & Adaptability for Nakuru's Urban Evolution'. Below the banner are three content cards: 1. 'Intergrated Development Plan (IDEP)' with a background of various fruits. 2. 'SDG's (Voluntary Local Review)' with a background of the 17 Sustainable Development Goals icons and the text 'THE GLOBAL GOALS'. 3. A diagram showing 'Model Projects' in a red gear, 'Regeneration plan 2019+ NMIDeP' in a grey gear, and 'Vision 2050' in a blue gear, with the text 'Not every place you fit into a box'.

[Resources](#)

[Support](#)

[About](#)

Challenges

- Quality and reliability of data (data credibility and source)
- Institutional capacity to support digitalization (skills and infrastructure)
- Practice of Multiplicity / Segmentation of local development plans and priorities
- Character of governance and management
- Financing of the VLR (Dashboard)

Lessons

- Investing in political buy-in at the highest level during the early part of VLR is key to driving institutional acceptance of new techniques such as the Dashboard
- Positioning the VLR as a utility tool in the routine processes of local development planning and progress assessment is key to its integration in the planning cycles
- Embedding multi-functionality in the dashboard that allows for routine governance and management decisions is key to unlocking the institutional barriers
- Incorporating continuous capacity building for transfer of skills and knowledge on the dashboard functionality and scope is important in building traction and unlocking local capacity building funds
- Introducing an air of competition can drive local passion for the VLR and its instruments of display
