

*Criteria to be fulfilled by public authorities before the private sector can contribute to the enhancement of zero emission public transport system in Asia*

**Akash Passey**  
**Senior Vice President**  
**Volvo Bus Corporation**

For a transport system to thrive, commuters are key

A vibrant city street scene featuring a modern Volvo bus in the center. The bus is white with a green accent and displays the route number '55' and destination 'Lindholmen Science park' on its front. The license plate is 'EPO 1360'. The bus is driving on a cobblestone street. On either side of the street, there are outdoor dining areas with many people sitting at tables, enjoying meals and drinks. The buildings are multi-story with large windows and balconies. The overall atmosphere is bright and lively, suggesting a high-quality urban environment.

Make the right  
choices for your city

# Criteria to incentivize private participation

1. Long-term zero emission policy & regulatory framework
2. Enabling infrastructure and clean energy supply
3. Adapted financing, tender models and contracting framework

**Thank You!**

**Driving quality of life.**
