## 1. BACKGROUND

The Third International Conference on Small Island Developing States (SIDS) held in September 2014, agreed that many of the processes outlined in earlier internationally agreed sustainable development frameworks on SIDS' including the Barbados Programme of Action (BPoA) and the Mauritius Strategy were still being implemented and, that there was still the need for a more integrated approach to the sustainable development in SIDS. Its outcome document, the SIDS Accelerated Modalities of Action (SAMOA) Pathway was therefore designed to integrate those earlier frameworks into the post-2015 sustainable development aspirations and priorities of SIDS for the period 2015–2025. It also reaffirms the situation of SIDS as a special case for sustainable development.

The UN Department of Economic and Social Affairs (UNDESA), as part of its mandate to enable countries to translate their global commitments into national action in the economic, social and environmental spheres of development, and to make informed decisions through data collection for monitoring and evaluation of these commitments, through its SIDS Unit, is implementing General Assembly Resolution 74/217 which *inter alia* asks for support to Small Island Developing States (SIDS) to monitor and evaluate progress on the SAMOA Pathway “*priority areas not covered by the Sustainable Development Goals or the Sendai Framework for Disaster Risk Reduction 2015–2030, and, if any are identified, to develop forthwith targets and indicators for those priority areas while ensuring complementarities and synergies and avoiding duplication, in order to strengthen monitoring and evaluation and noting the work being done by the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States to develop a toolkit for a harmonized approach to the implementation of the Samoa Pathway as a whole* (OP20).

The need for a monitoring and accountability framework and tools for the SAMOA Pathway, adapted to the capacity of SIDS to monitor and report on the implementation of the Samoa Pathway and other sustainable development related global mandates, while also avoiding the burden of multiple reporting frameworks has been recognized and recommended and it is now being undertaken. This exercise when completed will provide: (a) a common set of indicators on shared issues; (b) common reporting modules on shared issues; (c) interoperability of information management and reporting systems; and (d) harmonization of tools for national reporting. The following therefore recommends a core set of indicators for the Priority Actions of the SAMOA Pathway – the shared issues of Small Island Developing States (SIDS).

## 2. RATIONALE FOR DEVELOPING AND IMPLEMENTING A MONITORING FRAMEWORK FOR THE SAMOA PATHWAY

Since the adoption in 2014 of the SAMOA Pathway with the actions determined by SIDS as priorities for their sustainable development, several other global sustainable development policy frameworks have been developed. The most seminal of these frameworks is the 2030 Agenda on Sustainable Development adopted in September 2015. Among the other frameworks adopted in 2015 are the Sendai Framework on Disaster Risk Reduction, the Addis Ababa Action Agenda on Financing for Development and the Paris Agreement on Climate Change. Unlike the SAMOA Pathway, these other global policy agreements have their accompanying monitoring framework. The 2030 Agenda for Sustainable Development is being operationalized through seventeen 17 Goals for which there are 169 targets. The Sendai Framework Monitor consists of four (4) priorities for action, seven (7) global targets and 38 indicators<sup>2</sup>. The Addis Ababa Action Agreement on Financing for Development (AAAA/FfD) has a monitoring framework that incorporates all the SDG means of implementation targets into a comprehensive and integrated, cross-cutting and holistic financing architecture. Karobi and Esprey with Durand-Delacre (2016) prepared an 'Indicators and a Monitoring Framework for AAAA/ FfD.' Under the Paris Agreement, a Global Stocktake (GST) of national efforts to achieve emissions reduction targets and assess overall progress on its goals is built into the global Agreement on Climate Change.

Monitoring frameworks serve as a guide for further actions by governments, international organizations, the business sector, civil society, and philanthropists. They facilitate accountability and continuity through their enablement of follow-up and review. More importantly, in the case of SIDS, where development priorities outweigh the means of implementation, a monitoring framework for the SAMOA Pathway will allow both domestic and international resources to be more targeted. Further there will be greater accountability for results on national, regional and global commitments. The monitoring framework for the SAMOA Pathway is necessary for follow-up and review.

Embedded in the SAMOA Pathway is the requirement to report on progress in relation to SIDS through the SAMOA Pathway remains with the General Assembly and ECOSOC, including at the high-level political forum on sustainable development convened under their auspices. These bodies are required to devote adequate time to the discussion on sustainable development challenges facing SIDS in order to enhance engagement and implementation. The Secretary-General will prepare an annual report to the General Assembly on the progress achieved in implementing priorities, commitments, partnerships and other activities elaborated under the SAMOA Pathway. The UN General Assembly (UNGA) **convened in September 2019** a one-day high level mid-term review of the progress made in addressing the priorities of SIDS through the implementation of the SAMOA Pathway. During the preparatory process, it became clear that, in the absence of its own dedicated monitoring framework, SIDS could not adequately report on progress.

---

<sup>2</sup> It has a recently introduced a module on monitoring of the regional implementation of the Sendai Framework.

### **3. CHALLENGES IN THE DEVELOPMENT OF A MONITORING FRAMEWORK FOR THE SAMOA PATHWAY**

There are several examples of the processes that current monitoring frameworks have undergone in the course of their development. In the case of the development of the monitoring framework for the Sustainable Development Goals, an Inter-Agency and Expert Group on SDG Indicators (IAEG-SDGs) was established. The IAEG-SDGs met extensively and agreed upon the indicators that were eventually presented for approval to the United Nations Statistical Commission. The framework was later adopted by the General Assembly in July 2017.

The process of getting to the adoption of the Sendai Framework Monitor was also complex. In this case, an 'Open-ended Intergovernmental Expert Working Group (OIEWG)<sup>3</sup> on Indicators and Terminology requested the United Nations Office for Disaster Risk Reduction (UNDRR) to: (a) Develop minimum standards and metadata for disaster-related data, statistics and analysis (b) Develop methodologies for the measurement of indicators and the processing of statistical data with relevant technical partners; (c) Provide Member States with technical support, to conduct a review of data readiness; (d) Develop technical guidance material for the testing and roll-out of the indicators and the web-based monitoring system of the Sendai Framework monitoring mechanism.

Overall, the process of development of the frameworks for monitoring all of the global instruments involves consultations by multi-disciplinary technical working groups. Consultations were held at every level from selecting and validating indicators to verifying that there will be national capacities for data collection, collation, analysis and indicator development and common procedures for reporting and disseminating information. A specific challenge to the process of developing a monitoring framework for all of the global policy instruments is the integrated and sometimes overlapping commitments between and among them. As a solution, the governing bodies of the United Nations System entities noted that the monitoring and accountability frameworks for reporting on progress made with regard to the Sustainable Development Goals should be adapted to all contexts, including to the SAMOA Pathway for SIDS (A/72/119/Add.1, para. 11).

Developing and implementing a monitoring framework for the SAMOA Pathway is expected to be no less challenging than for the other global policy instruments. There are data issues to be considered, including definitions and measurements and harmonized approaches for national and regional reporting. As SIDS there are questions of the use of standard international definitions and methods of data collection and analysis and common legal bases (through their national Statistics Act) for reporting and disseminating information. There are also capacity issues for all stages of the monitoring process. SIDS are small and tend to have limited capacity to provide

---

<sup>3</sup> National government focal points, national disaster risk reduction offices, national statistical offices, the Department of Economic and Social Affairs and other relevant partners.

information for national policy making and planning. The extent to which a monitoring system will make demands for data for regional and SIDS-wide analysis will be a major consideration when the final set of indicators will be approved.

As an added challenge, the SAMOA Pathway's Priority Actions must be aligned to the SDG Targets and to the extent possible, the AAAA/FfD Commitments and the priorities of the Sendai Framework and Paris Agreement. Given the large number of Priority Actions in the SAMOA Pathway and the multi-dimensional nature of these Actions the monitoring framework has the potential to be unwieldy and even unmanageable for continuous data collection and analysis. Regional and SIDS-wide comparability of development progress will also demand additional capacity that smaller SIDS may not have or be able to afford unless the proposed monitoring framework is reduced to a very small core set of indicators.

#### **4. METHODOLOGY FOR DEVELOPING A MONITORING FRAMEWORK FOR THE SAMOA PATHWAY**

The main objective of the framework for the SAMOA Pathway is to derive a core set of indicators for monitoring priority actions that have been distilled from Resolution 69/15. This indicator framework will be aligned to the SDGs and where possible the Sendai Monitor, AAAA/FfD commitments and the Paris Agreement.

Several tasks are associated with achieving this objective starting with the establishment of the Priority Actions of the GA Resolution 69/15 and ending with an indicator framework for technical and other multi-stakeholder, particularly Member-States' validation. To achieve the final indicator framework a series of matrices have been used as the main methodological approach to carry out the necessary comparative analyses.

The first was used to elaborate the Priority Actions of the SAMOA Pathway and their dimensions – a critical aspect of the exercise, since many of the Actions were found to be multi-dimensional. The second matrix was utilized to establish the extent of alignment between the Priority Actions of the SAMOA Pathway and SDG Targets, Sendai Framework targets, the AAAA/FfD Commitments and the Paris Agreement. The third matrix then further aligned Sendai/AAAA-FfD/Paris/SDG Targets to relevant indicators. It is this matrix that has been used to establish whether there are gaps in the monitoring framework where no indicators from any of the frameworks (SDG/Sendai/AAAA-FfD/Paris) correspond to the specific SAMOA Pathway Priority Actions. The three matrices are attached as Annexes to this report. Annex 1 serves as a reference for the way the Priority Actions had been identified and their dimensions determined. Annex 2 shows the extent of alignment between the dimensions of Priority Actions and the SDGs and other post-2015 frameworks for disaster risk reduction, financing for development and climate change. Attachment A gives a suggested framework of indicators for the dimensions of the Priority Actions.

Following consultations with UNDESA, the United Nations Disaster Risk Reduction, AOSIS and also additional analysis and the perusal of core SDG indicators identified for monitoring by SIDS<sup>4</sup>, a further refinement exercise was undertaken. Further analysis revealed that there is a mix of targets that could benefit from quantitative measurement and others that were more conducive to qualitative assessment. It was further noted that many of the perceived ‘gaps’ in the framework are in reality the SAMOA Pathway’s Priority Actions that are policy and programmatic and other action-oriented ‘asks,’ requiring qualitative treatment. These ‘asks’ however are believed to be just as important to the Pathway’s monitoring process as the more quantitative measures. This Draft Report therefore presents two monitoring frameworks of equal importance to the SAMOA Pathway progress assessment process. They are shown as attachments A and B. Attachment A is a policy and programmatic (action) monitoring framework. Attachment B is a quantitative monitoring framework.

## 5. ANALYSIS

The outcome document of the Third International Conference on Small Island Developing States held in September 2014 (RES/69/15) articulates the SAMOA Pathway’s Priority Actions in paragraphs 23-116.

Table 1 shows the SAMOA Pathway’s Priority Action Clusters and their corresponding paragraph links to the document. This table shows that there are thirty (30) Priority Action Clusters with an *initial* total of one hundred and fifty-four (154) Priority Actions. Some of the Priority Actions were found to overlap and where there were repetitions or duplications of ‘asks,’ they were rationalized. In the end a total of total of 139 Priority Actions make up the monitoring system. A full appreciation of the multi-dimensional nature of the Priority Actions and the potential breath of the monitoring framework can be had from the Attachments A and B.

---

<sup>4</sup> The list of Unique CARICOM CORE INDICATORS prepared by the Regional Statistic Programme of the CARICOM Secretariat has been used a proxy for a SIDS monitoring framework.

**TABLE 1: SAMOA PATHWAY PRIORITY DEVELOPMENT GROUPS AND PRIORITY ACTIONS**

| <b>NO.</b> | <b>RES/69/15<br/>PARA</b> | <b>Priority Action Clusters</b>   | <b>No of Priority<br/>Actions</b> |
|------------|---------------------------|---|-----------------------------------|
| 1.         | 23-29                     | Sustained and sustainable, inclusive and equitable economic growth with decent work for all | 9                                 |
| 2.         | 30-                       | Sustainable Tourism   | 7                                 |
| 3.         | 31-46                     | Climate Change  | 4                                 |
| 4.         | 47-50                     | Sustainable Energy  | 8                                 |
| 5.         | 51-52                     | Disaster Risk Reduction   | 8                                 |
| 6.         | 53-58                     | Oceans and Seas   | 16                                |
| 7.         | 59-63                     | Food Security & Nutrition   | 7                                 |
| 8.         | 64-65                     | Water & Sanitation  | 4                                 |
| 9.         | 66-67                     | Sustainable Transportation  | 4                                 |
| 10.        | 68-69                     | Sustainable Consumption & Production  | 1                                 |
| 11.        | 70-71                     | Management of Chemicals & Waste, incl. Hazardous Waste                                      | 4                                 |
| 12.        | 72-75                     | Health & Non-Communicable Diseases  | 7                                 |
| 13.        | 76-77                     | Gender Equality & Women's Empowerment   | 9                                 |
| 14.        | 78-79                     | Social Development  | 2                                 |
| 15.        | 80-82                     | Culture & Sport   | 6                                 |
| 16.        | 83-86                     | Peaceful Societies & Safe Communities   | 4                                 |
| 17.        | 87-88                     | Education   | 3                                 |
| 18.        | 89-91                     | Biodiversity  | 4                                 |
| 19.        | 92-93                     | Desertification, Land Degradation & Drought   | 2                                 |
| 20.        | 94-                       | Forests   | 6                                 |
| 21.        | 95-                       | Invasive Alien Species  | 3                                 |
| 22.        | 96-                       | Means of Implementation   | 1                                 |
| 23.        | 97-101                    | Partnerships  | 5                                 |

| NO. | RES/69/15<br>PARA | Priority Action Clusters   | No of Priority<br>Actions |
|-----|-------------------|--|---------------------------|
| 24. | 102-106           | Financing  | 4                         |
| 25. | 107-              | Trade  | 4                         |
| 26. | 108-109           | Capacity-Building  | 10                        |
| 27. | 110-111           | Technology   | 2                         |
| 28. | 112-114           | Data & Statistics  | 3                         |
| 29. | 115-              | Role of the UN System & Relevant Inter-Governmental<br>Organizations | 3                         |
| 30. | 116-117           | Institutional Support for SIDS                                       | 4                         |

As indicated in Section 4 above, some SAMOA Pathway Priority Actions include those that require qualitative assessment, for example, the development of policies and programmes to promote gender equality or setting of national regulatory and policy frameworks to enable business and industry to advance sustainable development initiatives or 'to design and implement policy' or 'establish governance and management structures.' Added to the qualitative monitoring framework are indicators from the SDG monitoring framework that have been identified for 'global' aggregation. For example, there are several SDG indicators that will be assessed as the 'number of countries making progress in....' Further added are other indicators from the SDG monitoring framework that effectively requires a Yes/No response. For example 'Existence of a developed and operationalized national strategy for...'

In all therefore, there are approximately sixty-three (63) policy, programme and project development actions in the qualitative monitoring framework. These are actions and in the context of this exercise, while some do have indicators, no indicator development is required and there are no 'gaps' in this section of the framework (see Attachment A).

**THERE ARE SIXTY-THREE (63) POLICY,  
PROGRAMME AND PROJECT  
DEVELOPMENT PRIORITY ACTIONS IN  
THE QUALITATIVE MONITORING  
FRAMEWORK**

The second aspect of the proposed monitoring framework is one that facilitates quantitative assessment of relevant Priority Actions. These ‘asks’ have been gone through the alignment process with other major post-2015 frameworks. This process has revealed significant duplication among Priority Actions, including between targets across clusters. Repetition is most evident in Priority Actions that relate to capacity development, resource mobilization and financing development activities including for data collection and the development of statistical services.

Having rationalized the duplications etc., the quantitative framework assesses 76 Priority Actions with 110 indicators drawn from the SDGs, Sendai Framework, AAAA/FfD and the Paris Agreement. Sixty (60) indicators are also the same as those identified by SIDS as ‘unique core indicators.’

**THERE ARE 76 PRIORITY ACTIONS AND 110 INDICATORS IN THE QUANTITATIVE MONITORING FRAMEWORK**

**60 OF THE 110 INDICATORS ARE PART OF THE SIDS CORE SDG MONITORING FRAMEWORK**

There is significant alignment between the SAMOA Pathway’s Priority Actions and the SDG indicators particularly, but also with the relevant Sendai monitoring indicators and the Paris Agreement. There is however remaining a total of eight (8) Priority Actions for which there are no indicators.

**GAPS**  
**THERE ARE EIGHT (8) PRIORITY AREAS IN THE QUANTITATIVE MONITORING FRAMEWORK FOR WHICH THERE ARE NO INDICATORS**

## **6. FINDINGS AND RECOMMENDATIONS**

A monitoring framework for the SAMOA Pathway is necessary if SIDS are to track their development progress individually and as a group. It is also necessary that the framework of indicators for monitoring the SAMOA Pathway is aligned to the broader global 2030 Agenda for Sustainable Development and the SDGs and also other global policy frameworks that are critical to their development, such as the Sendai Framework

for Disaster Risk Reduction, the Addis Ababa Action Agenda on Financing for Development (AAAA/FfD) and the Paris Agreement.

The overarching objective of this exercise is to develop a monitoring framework for the SAMOA Pathway that is fully aligned to the SDGs and other major post-2015 global frameworks. Primary to this exercise is alignment between the proposed framework and major post-2015 sustainable development framework. Secondly it is to establish and fill any gaps that remain after the alignment process with those frameworks. When taken as a whole, the 'gaps' in the framework reflect the need primarily for policy, programme and project action by SIDS. These actions consisted of almost one-half of the framework and proved to be important to SIDS' efforts at sustainable development. As a result they were removed and given prominence as a separate framework. (Attachment A). Notably the majority of policy and programme actions are in the areas of Oceans and Seas, Climate Change, Sustainable Energy, Health and Non-communicable Diseases, Culture and Sport and Capacity Building.

The remaining Priority Actions that constitute the quantitative monitoring framework are very closely aligned with the major post-2015 development agendas. Gaps that remain however are in the areas of Oceans and Seas, Sustainable Transportation, Culture and Sport, Education, Biodiversity, Invasive Alien Species and Capacity Development. Notably also is that of the 110 indicators proposed for monitoring, sixty (60) of these indicators have been identified as being of core interest to SIDS. (Attachment B).

As the way forward to finalizing this proposed framework, it is recommended that a consultation is held with SIDS/AOSIS Member States and other technical personnel (forming a multi-stakeholder group). In anticipation that this multi-stakeholder validation group may wish to consider separating policy-related Priority Actions from those that are technical and finance-related, the proposed framework is present in two parts, so as to facilitate that discussion. Comments and recommendations from the multi-stakeholder group will be used to further refine the framework(s), before it/they is/are presented for information of the UN Statistical Commission at its 53<sup>rd</sup> Session in 2022. Finally, UNDESA may then wish to present the final framework of indicators for monitoring the SAMOA Pathway to ECOSOC and the General Assembly.

## ATTACHMENT A

### PROPOSED SAMOA PATHWAY PRIORITY ACTION QUALITATIVE MONITORING FRAMEWORK

| PRIORITY ACTIONS   | SDG TARGETS            | INDICATORS  | OTHER FRAMEWORKS |
|--|------------------------|---|------------------|
| <b>CLUSTER 23- 29: Sustained and Sustainable, Inclusive and Equitable Economic Growth with Decent Work for all</b>   |                        |   |                  |
| (a) Promoting and enhancing gender equality and women's equal participation, including in policies and programmes in the public and private sectors in small island developing States; | 5.c<br>Global/Regional | 5.c.1 Proportion of countries with systems to track and make public allocations for gender equality and women's empowerment               |                  |
| (b) Setting national regulatory and policy frameworks, as appropriate, that enable business and industry to advance sustainable development initiatives                                | QUALITATIVE            |   |                  |
| <b>CLUSTER 30: Sustainable Tourism</b>   |                        |   |                  |
| (a) Developing and implementing policies that promote responsive, responsible, resilient and sustainable tourism   | 8.9                    | 8.9.1 Tourism direct GDP as a proportion of total GDP (and in growth rate) <sup>1</sup><br><br>(NB. Assumption that a policy is in place) |                  |

|--|-------------|---|--|
| <b>CLUSTER 23- 29: Sustained and Sustainable, Inclusive and Equitable Economic Growth with Decent Work for all</b>   |             |   |  |
| (a) Enhance international cooperation, exchanges and investments in formal and non-formal education and training...  | 4.b         | 4.b.1 Volume of official development assistance flows for scholarships by sector and type of study <sup>i</sup>                                   |  |
| (b) Enhance the enabling environment at the national and regional levels to attract more public and private investment in building and maintaining appropriate infrastructure  | 9.a         | Total official international support (ODA plus other official flows) to infrastructure  |  |
| (c) Foster entrepreneurship and innovation, building capacity and increasing the competitiveness and social entrepreneurship of micro, small and medium-sized enterprises and State-owned enterprises in small island developing States... | 8.3         | 8.3.1 Proportion of informal employment in total employment, by sector and sex <sup>1</sup>   |  |
|  | 9.3         | 9.3.1 Proportion of small-scale industries in total industry value added  |  |
| (d) Support national, regional and international initiatives that develop and increase the capacity and development impact of the financial services industry in small island developing States;   | 8.10        | 8.10.2 Proportion of adults (15 years and older) with an account at a bank or other financial institution or with a mobile-money-service provider |  |
|  | 9.3         | 9.3.2 Proportion of small-scale industries with a loan or line of credit  |  |
| (e) Promote and enhance the use of information and communications technologies for, inter alia, education, the creation of employment, in particular youth employment  | 4.4         | 4.4.1 Proportion of youth and adults with information and communications technology (ICT) skills, by type of skill                                |  |
| <b>CLUSTER 30: Sustainable Tourism</b>   |             |   |  |

|   |   |  |                               |
|---|---|--|-------------------------------|
| (a) Develop and implement policies that promote responsive, responsible, resilient and sustainable tourism  | 8.9<br><br>QUALITATIVE<br>WITH<br>INDICATOR | 8.9.1 Tourism direct GDP as a proportion of total GDP (and in growth rate) <sup>1</sup><br><br>(NB. Assumption that a policy is in place)  |                               |
| <b>CLUSTER 31 - 46: Climate Change</b>  |   |  |                               |
| (a) Address remaining gaps in capacity for gaining access to and managing climate finance   | QUALITATIVE<br><br>13.a                     | 13.a.1 Amounts provided and mobilized in United States dollars per year in relation to the continued existing collective mobilization goal of the \$100 billion commitment through to 2025 |                               |
|   | PARIS<br>AGREEMENT                          | Assessment of financial, technology transfer and capacity-building support needed and received under Articles 9, 10 & 11 (Paris Agreement: Article 13.10)                                  |                               |
| <b>CLUSTER 47 -50: Sustainable Energy</b>   |   |  |                               |
| (a) Develop a strategy and targeted measures to promote energy efficiency and foster sustainable energy systems based on all energy sources, in particular renewable energy sources, in small island developing States, such as wind, sustainable biomass, solar, hydroelectric, biofuel and geothermal energy; | 7.1   | 7.1.2 Proportion of population with primary reliance on clean fuels and technology   | N.B Is the Strategy in place? |
|   | 7.2   | 7.2.1 Renewable energy share in the total final energy consumption   |                               |
|   | 7.b   | 7.b.1 Installed renewable energy-generating capacity in developing countries (in watts per capita)   |                               |
| (b) Facilitate access to existing financing mechanisms to increase capital flows for the implementation of sustainable energy projects in small island developing States on renewable energy and energy efficiency;   | 7.a   | 7.a.1 International financial flows to developing countries in support of clean energy research and development and renewable energy production, including in hybrid systems               |                               |

|   |   |   |                              |
|---|---|---|------------------------------|
| (c) Support investment in initiatives by and for small island developing States, in particular the “SIDS DOCK” indicative project pipeline of renewable energy and energy efficiency and conservation projects, as well as in the areas of capacity-building and human resources development and public education and awareness;                                    | 7.a<br>(Same as b above BUT SIDS DOCK-specific) | 7.a.1 International financial flows to developing countries in support of clean energy research and development and renewable energy production, including in hybrid systems  |                              |
| <b>CLUSTER 51 -52: Disaster Risk Reduction</b>  |   |   |                              |
| (a) Access technical assistance and financing for early warning systems, disaster risk reduction and post-disaster response and recovery, risk assessment and data, land use and planning, observation equipment, disaster preparedness and recovery education programmes, including under the Global Framework for Climate Services, and disaster risk management; |   | Total official international support (ODA plus other official flows) for the transfer and exchange of disaster risk reduction-related technology (SENDAI F-4)<br><br>Number of international, regional and bilateral programmes and initiatives for the transfer and exchange of science, technology and innovation in disaster risk reduction for developing countries   | SENDAI F-4<br><br>SENDAI F-5 |
| (b) Promote cooperation and investment in disaster risk management in the public and private sectors;   |   | Total official international support (ODA plus other official flows for disaster risk-reduction-related capacity-building in developing countries   | SENDAI F-6                   |
| (c) Strengthen and support contingency planning and provisions for disaster preparedness and response, emergency relief and population evacuation, in particular for people in vulnerable situations, women and girls, displaced persons, children, older persons and persons with disabilities   | 13.1  | 13.1.1 Number of deaths, missing persons and directly affected persons attributed to disasters per 100,000 population <sup>1</sup><br><br>Number of people per 100,000 that are covered by early warning information through local governments or through national dissemination mechanisms<br><br>Percentage of local governments having a plan to act on early warnings | SENDAI G-3<br><br>SENDAI G-4 |

|  |      |   |            |
|--|------|---|------------|
| (d) Harmonize national and regional reporting systems, where applicable, to increase synergies and coherence;  |      | Percentage of local governments that adopt and implement local disaster risk reduction strategies in line with national strategies <sup>12</sup>  | SENDAI E-2 |
| <b>CLUSTER 53 -58 Oceans and Seas</b>  |      |   |            |
| a) Promote and support national, sub-regional and regional efforts to assess, conserve, protect, manage and sustainably use the oceans, seas and their resources by supporting research and the implementation of strategies on coastal zone management and ecosystem-based management....   | 14.a | 14.a.1 Proportion of total research budget allocated to research in the field of marine technology  |            |
| (b) Engage in national and regional efforts to sustainably develop the ocean resources of small island developing States and generate increasing returns for their peoples   | 14.4 | 14.4.1 Proportion of fish stocks within biologically sustainable levels <sup>1</sup>  |            |
| (c) Address marine pollution by developing effective partnerships, including through the development and implementation of relevant arrangements, such as the United Nations Environment Programme Global Programme of Action for the Protection of the Marine Environment from Land-based Activities, <sup>13</sup> and, as appropriate, instruments on marine debris and on nutrient, wastewater and other marine pollution, and through the sharing and implementation of best practices; | 14.1 | 14.1.1 (a) Index of coastal eutrophication; and (b) plastic debris density <sup>i</sup><br><br>NB. Emphasis on partnerships for addressing marine pollution NOT on measuring marine debris<br><br>Qualitative analysis preferable   |            |
| (d) Support the sustainable development of small-scale fisheries, improved mechanisms for resource assessment and management and enhanced facilities for fisheries workers, as well as initiatives that add value to outputs from small-scale fisheries, and to enhance access to markets for the products of sustainable small-scale fisheries of small island developing States  | 14.b | 14.b.1 Degree of application of a legal/regulatory/ policy/institutional framework which recognizes and protects access rights for small-scale fisheries<br><br>(NB1: Assumption that legal framework in place)<br><br>(NB2: How will 'degree' be measured? - may require qualitative assessment) |            |

<sup>12</sup><sup>12</sup> Information should be provided on the appropriate levels of government below the national level with responsibility for disaster risk reduction.

<sup>13</sup> A/51/116, annex II.

|  |  |  |                                |
|--|--|--|--------------------------------|
| (e) (1) Enhance the capacity of small island developing States to sustainably use their fisheries resources and develop fisheries-related industries, enabling them to maximize benefits from their fisheries resources and (2) ensure that the burden of conservation and management of ocean resources is not disproportionately transferred to small island developing States   | PROPOSAL   | (1) Percentage of SMEs reporting value-added to their fisheries resources<br>(2) Degree of engagement of SIDS in the negotiations in the development of the IA on BBNJ |                                |
| (f) Enhance local, national, regional and global cooperation to <u>address the causes</u> of ocean acidification and to <u>further study</u> and minimize its impacts, including through information-sharing, regional workshops, the integration of scientists from small island developing States into international research teams, steps to make marine ecosystems more resilient to the impacts of ocean acidification and the possible development of a strategy for all small island developing States on ocean acidification | 14.3<br><br>QUALITATIVE WITH INDICATOR<br>+<br>(Study the causes of ocean acidification) | 14.3.1 Average marine acidity (pH) measured at agreed suite of representative sampling stations  |                                |
| (g) Conserve by 2020 at least 10 per cent of coastal and marine areas in small island developing States, especially areas of particular importance for biodiversity and for ecosystem services, through effectively and equitably managed, ecologically representative and well-connected systems of protected areas and other effective area-based conservation measures in order to reduce the rate of biodiversity loss in the marine environment;  | 14.5   | 14.5.1 Coverage of protected areas in relation to marine areas <sup>1</sup>  |                                |
| <b>CLUSTER 59 - 63: Food Security and Nutrition</b>  |  |  |                                |
| (a) Promote the further use of sustainable practices relating to agriculture, crops, livestock, forestry, fisheries and aquaculture to improve food and nutrition security while ensuring the sustainable management of the required water resources   | 2.4  | 2.4.1 Proportion of agricultural area under productive and sustainable agriculture   |                                |
| (b) Promote open an efficient international and domestic markets to support economic development and optimize food security and nutrition  | 17.11  | 17.11.1 Developing countries' and least developed countries' share of global exports <sup>1</sup>  |                                |
| (c) Enhance international cooperation to maintain access to global food markets, particularly during periods of higher volatility in commodity markets   | 17.12  | 17.12.1 Weighted average tariffs faced by developing countries, least developed countries and small island developing States <sup>1</sup>                              | Focus:<br>global market access |

|  |     |   |            |
|--|-----|---|------------|
| (d) Increase rural income and jobs, with a focus on the empowerment of smallholders and small-scale food producers, especially women;  | 2.3 | 2.3.2 Average income of small-scale food producers, by sex and indigenous status  |            |
| (e) End malnutrition in all its forms, including by securing year-round access to sufficient, safe, affordable, diverse and nutritious food  | 2.2 | 2.2.1 Prevalence of stunting (height for age <-2 standard deviation from the median of the World Health Organization (WHO) Child Growth Standards) among children under 5 years of age <sup>1</sup> |            |
| (f) Enhance the resilience of agriculture and fisheries to the adverse impacts of climate change, ocean acidification and natural disasters  |     | Direct agricultural loss attributed to disasters  | SENDAI C-2 |
| <b>CLUSTER 64 - 65: Water and Sanitation</b>   |     |   |            |
| (a) Develop institutional and human capacities for the effective, inclusive and sustainable implementation of the integrated management of water resources and related ecosystems, including supporting women's engagement in water management systems | 6.5 | 6.5.1 Degree of integrated water resources management   |            |
|  | 6.6 | 6.6.1 Change in the extent of water-related ecosystems over time  |            |
| (b) Provide and operate appropriate facilities and infrastructure for safe drinking water, sanitation, hygiene and waste management systems, including the exploration of desalination technology where economically and environmentally feasible;     | 6.1 | 6.1.1 Proportion of population using safely managed drinking water services <sup>1</sup>  |            |
|  | 6.2 | 6.2.1 Proportion of population using (a) safely managed sanitation services and (b) a hand-washing facility with soap and water <sup>1</sup>  |            |

|   |          |   |  |
|---|----------|---|--|
|   | 6.a      | 6.a.1 Amount of water- and sanitation-related official development assistance that is part of a government-coordinated spending plan <sup>1</sup>   |  |
| (c) Facilitate the expansion of wastewater treatment, recycling and reuse in the context of the sustainable and efficient use of water resources  | 6.3      | 6.3.1 Proportion of domestic and industrial wastewater flows safely treated   |  |
| (d) Improve water-use efficiency and work towards eliminating over-extraction, especially of groundwater, and to mitigate the effects of saltwater intrusion  | 6.4      | 6.4.1 Change in water-use efficiency over time  |  |
|   |          | 6.4.2 Level of water stress: freshwater withdrawal as a proportion of available freshwater resources <sup>1</sup>   |  |
| CLUSTER 66 -67 Sustainable Transportation   |          |   |  |
| (a) Access environmentally sound, safe, affordable and well-maintained transportation   | 11.2     | 11.2.1 Proportion of population that has convenient access to public transport, by sex, age and persons with disabilities <sup>1</sup>  |  |
| (b) To increase energy efficiency in the transport sector   | PROPOSAL | Total fuel consumption by all sections of the transport sector  |  |
| CLUSTER 68 - 69: Sustainable Consumption and Production   |          |   |  |
| CLUSTER 70 - 71: Management of Chemicals and Waste, including Hazardous Waste   |          |   |  |
| (a) Enhancing technical cooperation programmes, including those under the Basel Convention on the Control of Transboundary Movements of Hazardous Wastes and Their Disposal, <sup>14</sup> the Strategic Approach to International Chemicals Management of the United Nations Environment Programme, the secretariat of the Pacific Regional Environment Programme, the London Convention and | 12.4     | 12.4.1 Number of parties to international multilateral environmental agreements on hazardous waste, and other chemicals that meet their commitments and obligations in transmitting information as required by each relevant agreement <sup>1</sup> |  |

<sup>14</sup> United Nations, *Treaty Series*, vol. 1673, No. 28911.

|  |      |  |  |
|--|------|--|--|
| Protocol and the International Convention for the Prevention of Pollution from Ships, to <u>strengthen national, regional and international mechanisms for the management of waste</u> , including chemical and hazardous waste, ship- and aircraft-generated waste and marine plastic litter, and further <u>strengthening and expanding geographic coverage of oil spill contingency plans</u> ; |      | 12.4.2 (a) Hazardous waste generated per capita; and (b) proportion of hazardous waste treated, by type of treatment   |  |
| (b) Facilitating improved access to existing capacity-building programmes, such as those under the International Health Regulations of the World Health Organization, which call for strengthened management of specific risks, including control programmes for chemical and other toxic and environmental events   | 12.4 | 12.4.2 (a) Hazardous waste generated per capita; and (b) proportion of hazardous waste treated, by type of treatment<br><br>NB. Focus is on CB for management of hazardous waste |  |
| <b>CLUSTER 72 - 75: Health And Non-communicable Diseases</b>   |      |  |  |
| (a) Achieve universal access to HIV prevention, treatment, care and support and to eliminate mother-to-child transmission of HIV, as well as to renew and strengthen the fight against malaria, tuberculosis and neglected emerging and re-emerging tropical diseases, including chikungunya and dengue.   | 3.3  | 3.3.1 Number of new HIV infections per 1,000 uninfected population, by sex, age and key populations <sup>1</sup>   |  |
|  |      | 3.3.2 Tuberculosis incidence per 100,000 population <sup>1</sup>   |  |
|  |      | 3.3.3 Malaria incidence per 1,000 population <sup>1</sup>  |  |
|  |      | 3.3.4 Hepatitis B incidence per 100,000 population <sup>1</sup>  |  |
|  |      | 3.3.5 Number of people requiring interventions against neglected tropical diseases <sup>1</sup>  |  |

|   |     |  |  |
|---|-----|--|--|
| (b) To reduce maternal, newborn and child mortality and improve the health of mothers, infants and children           | 3.1 | 3.1.1 Maternal mortality ratio <sup>1</sup>  |  |
|   |     | 3.1.2 Proportion of births attended by skilled health personnel <sup>1</sup>   |  |
|   | 3.2 | 3.2.1 Under-5 mortality rate <sup>1</sup>  |  |
|   |     | 3.2.2 Neonatal mortality rate <sup>1</sup>   |  |
| CLUSTER 76 -77 Gender Equality and Women's Empowerment  |     |  |  |
| (a) Strengthen women's economic empowerment and ensure equal access to full and productive employment and decent work | 5.a | 5.a.2 Proportion of countries where the legal framework (including customary law) guarantees women's equal rights to land ownership and/or control |  |
|   | 8.3 | 8.3.1 Proportion of informal employment in total employment, by sector and sex <sup>1</sup>  |  |
|   | 8.5 | 8.5.1 Average hourly earnings of employees, by sex, age, occupation and persons with disabilities <sup>1</sup>                                     |  |

|  |     |   |  |
|--|-----|---|--|
|  |     | 8.5.2 Unemployment rate, by sex, age and persons with disabilities <sup>1</sup>   |  |
| (c) End all forms of violence against women and girls  | 5.2 | 5.2.1 Proportion of ever-partnered women and girls aged 15 years and older subjected to physical, sexual or psychological violence by a current or former intimate partner in the previous 12 months, by form of violence and by age <sup>1</sup> |  |
|  |     | 5.2.2 Proportion of women and girls aged 15 years and older subjected to sexual violence by persons other than an intimate partner in the previous 12 months, by age and place of occurrence <sup>1</sup>   |  |
| (d) Ensure women's full, equal and effective participation in all fields and leadership at all levels of decision-making in the public and private sectors through such policies and actions as temporary special measures, as appropriate, and by setting and working to achieve concrete goals, targets and benchmarks;  | 5.5 | 5.5.1 Proportion of seats held by women in (a) national parliaments and (b) local governments <sup>1</sup>  |  |
|  |     | 5.5.2 Proportion of women in managerial positions <sup>1</sup>  |  |
| (e) Equal access to good-quality education and health care   | 4.1 | 4.1.1 Proportion of children and young people (a) in grades 2/3; (b) at the end of primary; and (c) at the end of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics, by sex <sup>1</sup>         |  |
|  | 4.2 | 4.2.2 Participation rate in organized learning (one year before the official primary entry age), by sex <sup>1</sup>  |  |
| (f) Ensure in small island developing States the promotion and protection of the human rights of all women <u>and</u> their sexual and reproductive health and reproductive rights in accordance with the Programme of Action of the International Conference on Population and Development, the Beijing Platform for Action and the outcome documents of their review conferences | 5.6 | 5.6.1 Proportion of women aged 15-49 years who make their own informed decisions regarding sexual relations, contraceptive use and reproductive health care <sup>1</sup>  |  |

|  |     |   |  |
|--|-----|---|--|
|  |     | 5.6.2 Number of countries with laws and regulations that guarantee full and equal access to women and men aged 15 years and older to sexual and reproductive health care, information and education   |  |
| (g) Give women equal rights with men to economic resources, including access to, ownership of and control over land and other forms of property, credit, inheritance, natural resources and appropriate new technologies.  | 5.a | 5.a.1 (a) Proportion of total agricultural population with ownership or secure rights over agricultural land, by sex; and (b) share of women among owners or rights-bearers of agricultural land, by type of tenure   |  |
| <b>CLUSTER 78 - 79 Social Development</b>  |     |   |  |
| 78. Support efforts to enhance social protection and inclusion, to improve well-being and to guarantee opportunities for the most vulnerable and disadvantaged   | 1.3 | 1.3.1 Proportion of population covered by social protection floors/systems, by sex, distinguishing children, unemployed persons, older persons, persons with disabilities, pregnant women, newborns, work-injury victims and the poor and the vulnerable <sup>1</sup> |  |
| 79. Support small island developing States in their commitment to development that is focused on poverty eradication, which should ensure that people, particularly those living in poverty, have equal access to education, health, food, water and sanitation and other public and social services and access to productive resources, including credit, land, training, knowledge, information and know-how | 1.2 | 1.2.1 Proportion of population living below the national poverty line, by sex and age <sup>1</sup>  |  |
|  |     | 1.2.2 Proportion of men, women and children of all ages living in poverty in all its dimensions according to national definitions <sup>1</sup>  |  |
|  | 1.4 | 1.4.1 Proportion of population living in households with access to basic services   |  |
|  |     | 1.4.2 Proportion of total adult population with secure tenure rights to land, (a) with legally recognized documentation, and (b) who perceive their rights to land as secure, by sex and type of tenure   |  |

|   |          |   |  |
|---|----------|---|--|
|   |          |   |  |
| <b>CLUSTER Culture and Sport 80 -82</b>   |          |   |  |
| (a) Develop cultural and creative industries, including tourism, that capitalize on their rich heritage and have a role to play in sustainable and inclusive growth   | 8.9      | 8.9.1 Tourism direct GDP as a proportion of total GDP (and in growth rate) <sup>1</sup>   |  |
| 82. Support the use of sport as a vehicle to foster development, social inclusion and peace, strengthen education, promote health and build life skills, particularly among youth   | PROPOSAL | Allocation of funds to Sports from the national budget as a percentage of the total budget  |  |
| <b>CLUSTER 83 -86 Promoting Peaceful Societies and Safe Communities</b>   |          |   |  |
| 83. Support small island developing States in their ongoing efforts to ensure peaceful societies and safe communities, including through building responsive and accountable institutions and ensuring access to justice and respect for all human rights, taking into account their national priorities and legislations.  | 16.a     | 16.a.1 Existence of independent national human rights institutions in compliance with the Paris Principles  |  |
| 84. Sustainable development of small island developing States can be negatively affected by crime and violence, including conflict, gang and youth violence, piracy, trafficking in persons, cybercrime, drug trafficking and transnational organized crime. In particular, the lack of sustainable livelihoods and opportunities for further education and the breaking down of community support structures can lead to increasing numbers of young men and women becoming involved in violence and crime | 16.1     | 16.1.1 Number of victims of intentional homicide per 100,000 population, by sex and age <sup>1</sup>  |  |
|   |          | 16.1.3 Proportion of population subjected to (a) physical violence, (b) psychological violence and (c) sexual violence in the previous 12 months <sup>1</sup> |  |

|   |          |   |  |
|---|----------|---|--|
| 85. Combat trafficking in persons, cybercrime, drug trafficking, transnational organized crime and international piracy by promoting the accession, ratification and implementation of applicable conventions, enacting and using legislation that prohibits trafficking, promoting strong institutions and improving protection mechanisms to ensure adequate care for victims of sex trafficking and forced labour in accordance with relevant national and international agreements and treaties | 16.2     | 16.2.2 Number of victims of human trafficking per 100,000 population, by sex, age and form of exploitation <sup>1</sup>   |  |
| <b>CLUSTER 87 - 88 Education</b>  |          |   |  |
| (a) Provide high-quality education and training for youth and girls with a focus on the most vulnerable, in particular persons with disabilities, including in creative, cultural and environment-related fields, so that all people have the necessary skills and can take advantage of employment opportunities to lead productive lives  | 4.1      | 4.1.2 Completion rate (primary education, lower secondary education, upper secondary education)   |  |
|   | 4.3      | 4.3.1 Participation rate of youth and adults in formal and non-formal education and training in the previous 12 months, by sex <sup>1</sup>   |  |
| (b) Ensure that education contributes to further building peace and promoting social inclusion  | 4.7      | 4.7.1 Extent to which (i) global citizenship education and (ii) education for sustainable development are mainstreamed in (a) national education policies; (b) curricula; (c) teacher education; and (d) student assessment |  |
| c) Increase investment in education, training and skills development for all, including vocational training, and to improve their access to formal and non-formal education   | PROPOSAL | Budget allocation to education and training, including skills and vocations training as a percentage of national budget   |  |

| CLUSTER 89 - 91 Biodiversity   |          |  |  |
|--|----------|--|--|
| (a) Conserve biological diversity, the sustainable use of its components and the fair and equitable sharing of the benefits arising out of the utilization of genetic resources  | 15.5     | 15.5.1 Red List Index <sup>1</sup>   |  |
|  | 15.6     | 15.6.1 Number of countries that have adopted legislative, administrative and policy frameworks to ensure fair and equitable sharing of benefits  |  |
| (b) Export organic, natural, sustainably produced and locally grown products   | PROPOSAL | Value of exports of organic and natural locally grown products as a percentage of exports of non-commercial agricultural crops   |  |
| (c) Access financial and technical resources for the conservation and sustainable management of biodiversity   | 15.a     | 15.a.1 (a) Official development assistance on conservation and sustainable use of biodiversity; and (b) revenue generated and finance mobilized from biodiversity-relevant economic instruments <sup>1</sup> |  |
| CLUSTER 92 - 93 Desertification, Land Degradation and Drought  |          |  |  |
| 92. Address desertification, land degradation and drought challenges for the achievement by small island developing States of food security and nutrition, their adaptation to climate change, the protection of their biodiversity and the development of resilience to natural disasters | 15.3     | 15.3.1 Proportion of land that is degraded over total land area  |  |

| CLUSTER 94 Forests  |          |   |  |
|---|----------|---|--|
| (a) Promote trade in legally and sustainably harvested forest products  | 15.7     | 15.7.1 Proportion of traded wildlife that was poached or illicitly trafficked   |  |
| (b) Achieve appropriate and effective reforestation, restoration and afforestation  | 15.1     | 15.1.1 Forest area as a proportion of total land area <sup>1</sup>  |  |
| (c) Improve the state of biological diversity by conserving and safeguarding ecosystems, species and genetic diversity  | 15.1     | 15.1.2 Proportion of important sites for terrestrial and freshwater biodiversity that are covered by protected areas, by ecosystem type <sup>1</sup>  |  |
| CLUSTER 95 Invasive Alien Species   |          |   |  |
| (c) Develop and strengthen capacity to address invasive alien species issues, including prevention, as well as increasing public awareness in small island developing States about this issue.  | PROPOSAL | Number of persons trained annually in seaport and airport monitoring of agricultural imports, including illegal imports   |  |
| CLUSTER 96 Means of Implementation  |          |   |  |
| 96. Enhanced global partnership for development, adequate provision and mobilization of all means of implementation and continued international support to achieve internationally agreed goals | 17.1     | 17.1.2 Proportion of domestic budget funded by domestic taxes <sup>1</sup>  |  |
|   | 17.2     | 17.2.1 Net official development assistance, total and to least developed countries, as a proportion of the Organization for Economic Cooperation and Development (OECD) Development Assistance Committee donors' gross national income (GNI) <sup>1</sup> |  |
|   | 17.3     | 17.3.1 Foreign direct investment, official development assistance and South-South cooperation as a proportion of gross national income <sup>1</sup>   |  |

|  |       |  |  |
|--|-------|--|--|
|  |       |  |  |
|  | 17.4  | 17.4.1 Debt service as a proportion of exports of goods and services <sup>1</sup>  |  |
| <b>CLUSTER 97 - 101 Partnerships</b>   |       |  |  |
| 97. Increase in all forms of partnership_with and for small island developing States   | 17.17 | 17.17.1 Amount of United States dollars committed to public-private and civil society partnerships   |  |
| 99. Enhanced international cooperation, including North-South, South-South and triangular cooperation, and especially cooperation among small island developing States.....for change, innovation and welfare  | 17.9  | 17.9.1 Dollar value of financial and technical assistance (including through North-South, South-South and triangular cooperation) committed to developing countries <sup>1</sup>           |  |
| <b>CLUSTER 102 - 106 Financing</b>   |       |  |  |
| (a) Strengthen the use of domestic policies and financing, with due consideration for their respective levels of indebtedness and national capacities  | 17.1  | 17.1.1 Total government revenue as a proportion of GDP, by source <sup>1</sup>   |  |
| (b) Implement, with the provision of appropriate financial resources, climate change adaptation and mitigation projects;   | 13.a  | 13.a.1 Amounts provided and mobilized in United States dollars per year in relation to the continued existing collective mobilization goal of the \$100 billion commitment through to 2025 |  |
| (c) Reduce transfer costs related to remittances while pursuing the international targets and agreed outcomes of important international initiatives set by the United Nations system concerning remittances, given their importance for the economic growth of small island developing States | 10.c  | 10.c.1 Remittance costs as a proportion of the amount remitted   |  |
|  | 17.3  | 17.3.2 Volume of remittances (in United States   |  |

|  |          |   |  |
|--|----------|---|--|
|  |          | dollars) as a proportion of total GDP <sup>1</sup>  |  |
| <b>CLUSTER 107 Trade</b>   |          |   |  |
| (a) Encourage engagement in trade and economic agreements, taking into consideration existing special and differential treatment provisions, as appropriate, and taking note of the work conducted to date under the work programme on small economies of the World Trade Organization | 10.a     | 10.a.1 Proportion of tariff lines applied to imports from least developed countries and developing countries with zero-tariff   |  |
|  | 17.12    | 17.12.1 Weighted average tariffs faced by developing countries, least developed countries and small island developing States <sup>1</sup>   |  |
| <b>CLUSTER 108 - 109 Capacity-Building</b>   |          |   |  |
| (a) Strengthen national institutions to complement capacity-building   | PROPOSAL | Creation of job positions (institutional capacity built) to support the human capacity development in all sectors   |  |
| (b) Build national capacity to utilize cost-benefit analysis for informed policymaking in the area of sustainable development, including models specific to small island developing States that evaluate the technical, financial, social, economic and environmental aspects          | PROPOSAL | Number of persons trained annually to analyse data and provide information for policy development, implementation and monitoring  |  |
| (c) Build national capacity to fulfil reporting requirements deriving from commitments made by small island developing States when signing international agreements and commitments  | 17.18    | 17.18.1 Proportion of sustainable development indicators produced at the national level with full disaggregation when relevant to the target, in accordance with the Fundamental Principles of Official Statistics <sup>1</sup> |  |
|  | 17.19    | 17.19.1 Dollar value of all resources made available to strengthen statistical capacity in developing countries <sup>1</sup>  |  |

|  |      |   |  |
|--|------|---|--|
|  |      |   |  |
| <b>CLUSTER 110 - 111 Technology</b>  |      |   |  |
| 110. Access by small island developing States to appropriate reliable, affordable, modern and environmentally sound technologies .....that provide incentives for innovation and entrepreneurship and that science, technology and innovation are essential enablers and drivers for sustainable development | 17.7 | 17.7.1 Total amount of funding for developing countries to promote the development, transfer, dissemination and diffusion of environmentally sound technologies |  |
| 111. Support the efforts of small island developing States to..... increase connectivity and the use of information and communications technology through improved infrastructure, training and national legislation, as well as public and private sector involvement                                       | 17.6 | 17.6.1 Fixed Internet broadband subscriptions per 100 inhabitants, by speed <sup>5</sup>  |  |
|  | 9.c  | 9.c.1 Proportion of population covered by a mobile network, by technology   |  |

|   |       |  |  |
|---|-------|--|--|
|   |       |  |  |
| CLUSTER 112 - 114 Data and Statistics   |       |  |  |
| (a) Strengthen the availability and accessibility of data and statistical systems, in accordance with national priorities and circumstances, and enhance their management of complex data systems, including geospatial data platforms, by launching new partnership initiatives or scaling up existing initiatives |       | 17.18.1 Statistical capacity indicator for Sustainable Development Goal monitoring <sup>1</sup>  |  |
|   | 17.19 | 17.19.1 Dollar value of all resources made available to strengthen statistical capacity in developing countries <sup>1</sup>   |  |
|   |       | 17.19.2 Proportion of countries that (a) have conducted at least one population and housing census in the last 10 years; and (b) have achieved 100 per cent birth registration and 80 per cent death registration <sup>1</sup> |  |
| CLUSTER 115 Role of UN System and Relevant Intern-governmental Organization   |       |  |  |
| (a) Make greater use of the national statistics and development   | 17.15 | 17.15.1 Extent of use of country-owned results   |  |

|  |  |   |  |
|--|--|---|--|
| indicators of small island developing States                             |  | frameworks and planning tools by providers of development cooperation |  |
| <b>116-117. Institutional Support for Small Island Developing States</b> |  |   |  |
