**Mainstreaming the 2030 Agenda and Agenda 2063 into national planning instruments and strategies**

# INTRODUCTION

- ❖ We meet at a time when confronted with the harsh reality of COVID-19.
- ❖ COVID-19 outbreak is a grim reminder that we are interconnected.
- ❖ It is precisely for this reason that we ought to be congruent in our plans and work together.
- ❖ COVID-19 is making the achievement of the 17 SDGs by 2030 and Agenda 2063 even more challenging.
- ❖ COVID-19 recovery presents us with an opportunity to urgently transform and act fast towards a more equitable and sustainable pathways for implementation of Development Agendas.
- ❖ COVID-19 relief actions has created deep cuts into existing programmes and budgets - thus undermining continuity, consistency and sustainable development.

# LONG TERM PLANNING PERSPECTIVE

**FOCUS ON LONG TERM DEVELOPMENT PLANNING IS FOUNDED IN REVISED GREEN PAPER OF 2010**

*“We need a long term perspective to realise our vision and Our efforts to massively reduce poverty and roll back the extreme inequalities. Growth and development, strengthening institutions, nation-building and a developmental state are long term projects. A single term of government is too short a time...”*

*“Lack of a coherent long term plan has weakened our ability to provide clear and consistent policies...to mobilise all of society in pursuit of our developmental objectives...to prioritise resource allocations and to drive implementation of government’s objectives and priorities. In addition, weaknesses in coordination of government have led to policy inconsistencies and, in several cases, poor service delivery outcomes.”*

# MAPPING MATRIX

Rows → SDGs Targets 169 / 39 AU Agenda 2063 Priorities

Columns → 13 NDP Chapters

Intersection of rows and columns – relevant NDP “Objectives”

One objective can contribute/respond to several SDG Targets / Agenda 2063 Priorities – Objectives not unique to one target / Priority – hence some appear in multiple SDGs/ AU 2063

<b>CRITERIA and DESCRIPTION</b>	<b>GREEN – Strong potential Impact of NDP Objective on SDG Target/ Agenda 2063 Priority</b>	<b>YELLOW – Moderate potential impact of NDP Objective on SDG Target /Agenda 2063 Priority</b>	<b>RED – Weak or no potential impact on NDP Objective on SDG Target/ Agenda 2063</b>
Impact of NDP Objective on SDG Target /AU 2063 Priority – incremental impact ratio	Can potentially contribute to a large proportion of SDG Target/ Agenda 2063 by 2030	Limited to moderate potential for additional impact to SDG target/ Agenda 2063	No potential for additional impact
Magnitude of impact – Target population including vulnerable groups and the least well-off	Majority of impact focused on vulnerable groups and the least well-off	Limited impact on vulnerable groups and the least well-off	Little or no impact on vulnerable groups and the least well-off
Speed of Impact – Length of time to realize the NDP Objective’s impact	Full impact realized within the MTSF cycle – 5 years	Partial impact will take more than 5 years to be realized	Impact will not be realized before 2030

# NDP GAP ANALYSIS

- ✓ NDP developed to respond to issues identified in diagnostic report – pre –SDG era, but during the post-2015 process
- ✓ Elements of SDGs left out of the NDP because:-
  1. SDG targets not a priority nor relevant for South Africa
  2. SDG targets a priority for South Africa, but are being dealt with outside the NDP
  3. NDP Objectives are critical to South Africa but not reflected in the SDG framework
- ✓ NDP Objectives which are high level and apply to all SDG targets – GDP growth, security, corruption, ICT, etc.

# KEY MESSAGES – MAPPING ANALYSIS

The NDP and the SDGs are highly aligned, with a convergence ratio of 74 percent. This means that 74 percent of the SDG targets are covered by the NDP

Only 13 SDG targets are not applicable to the South African Context.

The NDP objectives classified into high impact, medium impact and low impact should be read in tandem with the SDG indicator framework which Statistics South Africa has developed to measure progress towards attaining the SDGs.

If any of the SDG targets becomes a key priority, the analysis can guide policy makers as to which interventions could yield the best positive impact on particular SDG targets, while the gaps provide guidance on what SDG targets need to be addressed if they are currently not.

The remaining 26 percent (44 targets) of the 169 SDG targets are not covered within the framework of the NDP. Out of this, 33 targets are being addressed comprehensively in programmes running in parallel to the NDP.

The NDP is almost fully aligned to the AU Agenda 2063 at 94.87 %. The 5.17 % is addressed by South Africa's pan-Africanist history and the spirit of Ubuntu

Some NDP Objectives are common to all SDGs and cannot be attributable to any particular target – We call these enablers – Security, GDP growth, ICT (broadband) etc...

# PARTICIPATORY APPROACH

South Africa is committed to realising the 2030 Agenda for Sustainable Development and Agenda 2063, based on the principles of:

- **Collaboration** - strong partnerships between the government, civil society, chapter 9 institutions, trade unions, the private sector and academia.
- **Coherence** - The 2030 Agenda emphasises the integrated nature of development goals.
- **Impact** - The 2030 Agenda should be approached with a sense of urgency.

# COORDINATION MECHANISM

**Vision 2030: Our Future, Make it Work**

# KEY PRINCIPLES AND PRE-REQUISITES FOR IMPLEMENTATION

- Successful implementation of the development goals, aspirations and targets is dependent on availability of resources, recognising the prevailing constrained fiscal space.
- This requires trade-offs, priorities and optimal fiscal stance.

Partnership, Co-ownership and Collaboration  
(whole of Government & Society)

Prioritization, Focus & Resources  
(optimal fiscal stance and efficiencies)
