

School Mapping & Connecting

What do we do?

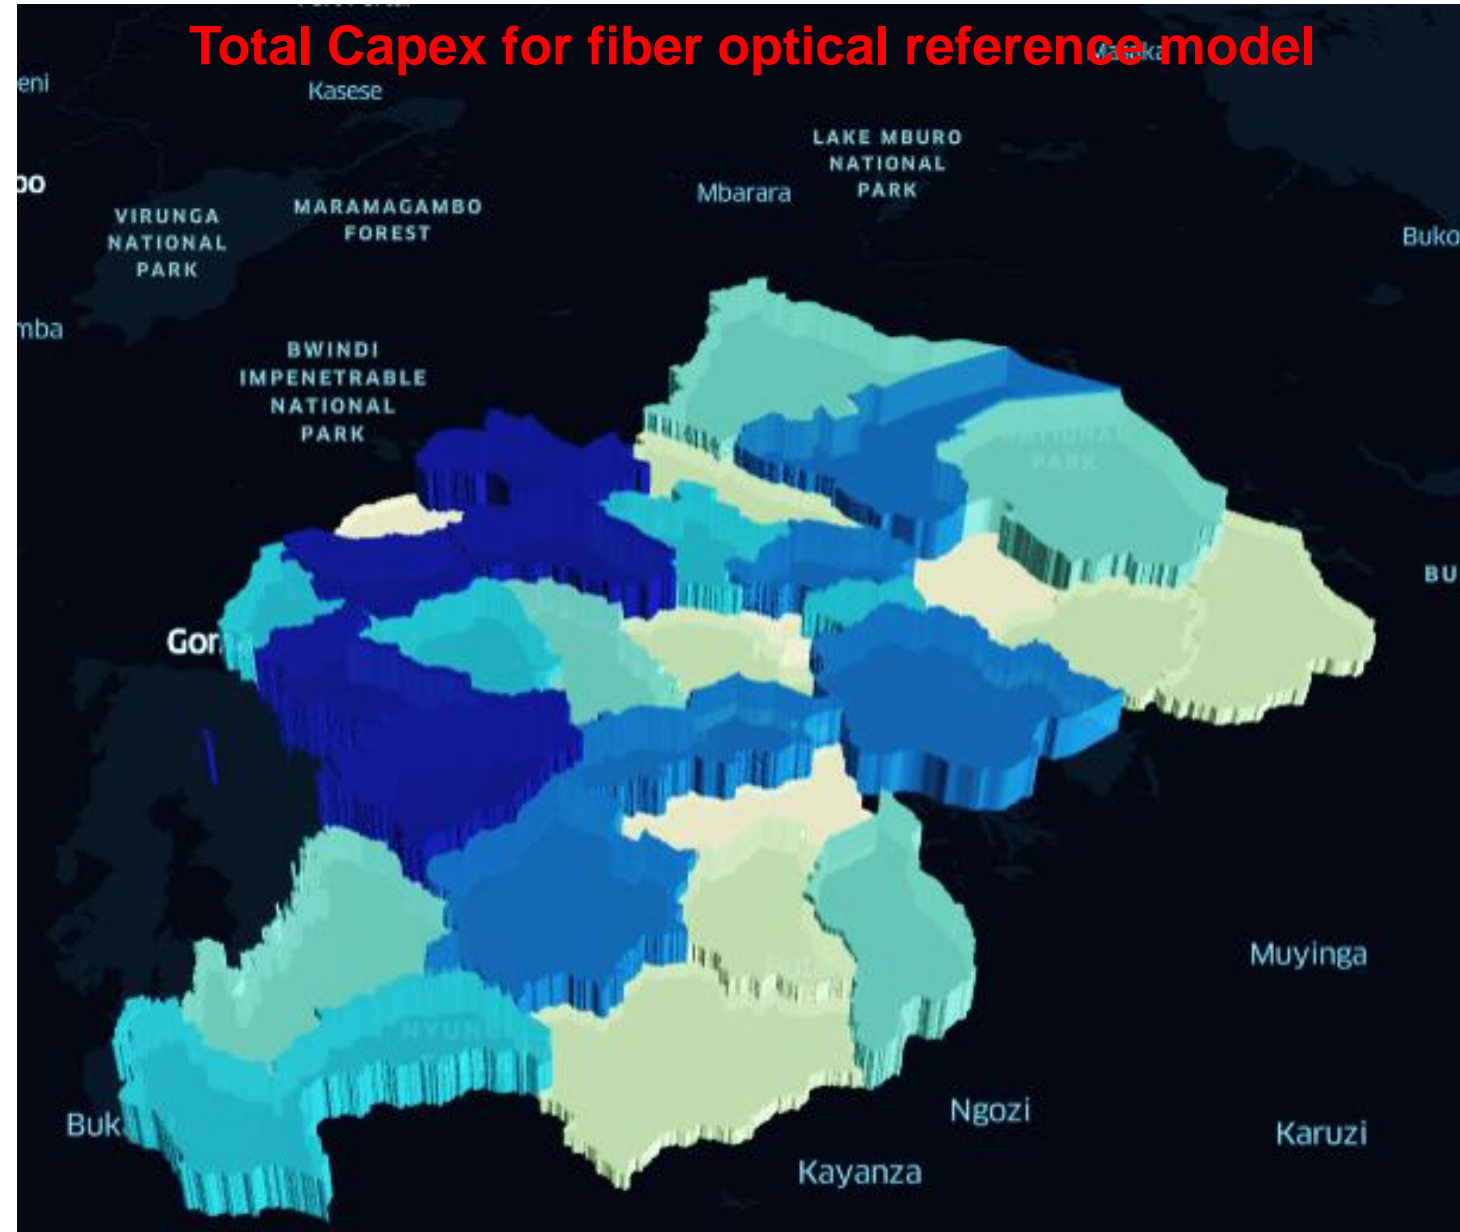

- Connectivity gaps
- Connection options
- Funding targets
- Informed decision-making

Ex: Connecting schools in Rwanda

Analytics

1. Collect, clean and map school data
2. Collect, clean and map Infra data
3. Identify internet connection options for unconnected schools
4. Create a reference network topology to connect schools to the internet
5. Calculate the investments required to address the gaps
6. Visualize collected and calculated data
7. Analyze collected and calculated data

Ex: Financial inclusion in Mexico
