

Ratih Pangestuti, Ph.D

Researcher at the National Research and Innovation Agency (BRIN)

Ratih Pangestuti is a research scientist at the National Research and Innovation Agency (BRIN), Indonesia. She received her Ph.D. from the Pukyong National University, South Korea, in 2012. After that, she became a postdoctoral research associate at the Marine Bioprocess Research Centre and the National Research Foundation of South Korea. Her research interest is marine biotechnology and coastal community's empowerments. She pays great attention to the exploration of marine life and its sustainability. Her latest research is using sea cucumbers and marine algae for medicinal raw materials, and nutraceuticals. Her publications have been widely used as references to marine biotechnology and food sciences areas.
