

8 March 2023

Statement to the UN 2023 Water Conference

The works of Banka BioLoo Limited and Banka Earth Foundation are dedicated to varied themes of the Conference, but we would like our focus to be on “Water for Sustainable Development”.

Water security, or the lack thereof, has emerged as one of the challenges in the years to come. With that, also, comes the issue of infrastructure creation. Banka Bio supports decentralized and onsite solutions: capital expenditure is not very high, solutions are localized, output resources can be re-used.

We believe such solutions offer multiple benefits – cost saving, waste and wastewater treatment onsite, and recoverable resources or outputs, for further re-use.

We would be happy to provide more, and specific, inputs; and will be glad to partner stakeholders in implementing such solutions, across countries and continents.

Thank you,

Sanjay Banka
Executive Chairman
Banka BioLoo Limited
Banka Earth Foundation
