

Synergy Solutions for a World in Crisis: Tackling Climate and SDG Action Together

REPORT ON STRENGTHENING THE EVIDENCE BASE

**NOVEMBER 2023** 

# Synergy Solutions for a World in Crisis: Tackling Climate and SDG Action Together

REPORT ON STRENGTHENING THE EVIDENCE BASE

**NOVEMBER 2023** 

Launched on: 13 September, SDG Studio, New York

Co-convened by: UN DESA and UNFCCC

Prepared by: Expert Group on Climate and SDG Synergy

Watch it here: bit.ly/SynergyReportLaunch

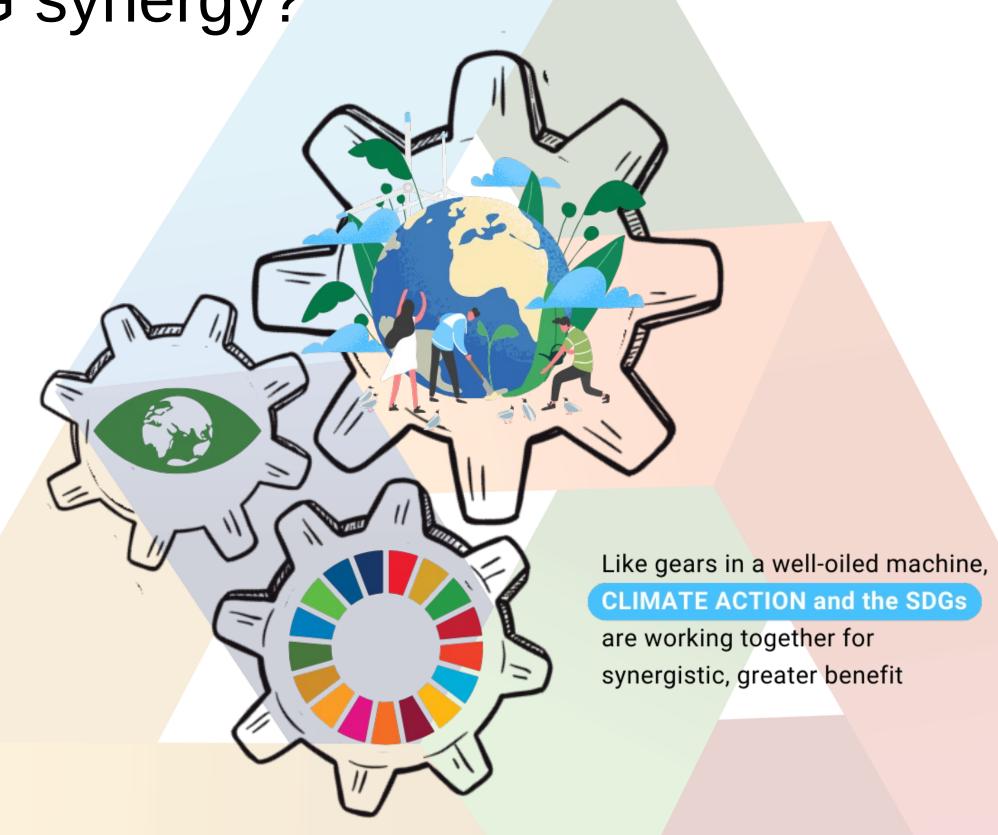

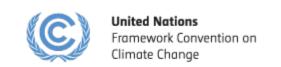

What is climate and SDG synergy?

**Definition**: Synergies occur when multiple actions combine to produce a result greater than their individual contributions.

In the context of climate change and SDGs, adopting a synergistic approach means addressing these challenges together, **amplifying the impact of policies** by addressing them jointly rather than in isolation.

#### Process towards the Report

### SDGs and climate action are not on track

The IPCC and SDG Report 2023:

Special Edition – global progress
assessments on climate change and
sustainable development –
underscore the necessity of a
systems approach to attain the 2030
global targets.

# **UN SG's call for** synergistic action

In his <u>priorities for 2023</u>, UN
Secretary-General has called for an urgent course correction, urging world leaders to come together behind a rescue plan for people and planet — a rallying cry for synergistic action.

## UN DESA and UNFCCC build a plan for action

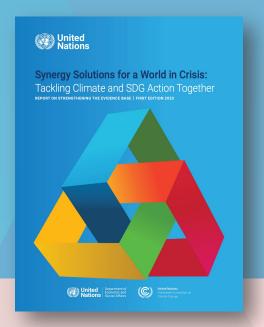

The inter-agency partnership aimed at fostering synergistic action between the SDGs and climate agenda, and the outcomes of three Global Synergy Conferences held since 2019, provide the essential platform, rationale, and urgency for this report.

# **Expert Group prepares the global report**

An international group of 14
experts was co-convened by UN
DESA and UNFCCC to draft the
first global report.

It is the first collaborative effort to
systematize knowledge on
synergistic climate and SDG
implementation, charting the
course for accelerated action.

### Work of the Expert Group

**Composition**: Independent group of 14 experts from diverse thematic and geographic backgrounds.

**Objective**: To prepare the first global report that builds on evidence-base and demonstrates win-win solutions of addressing climate and sustainable development challenges synergistically.

# The Challenge

We must solve the climate emergency and sustainable development challenges together, or we will not solve them at all.

# Addressing multiple crises on a short deadline

Need for accelerated action: Halfway to the 2030 Agenda, a mere 15% of SDG targets are on track and the climate crisis is worsening as GHG emissions continue to rise.

Breaking siloed approaches: Progress away from siloed approaches and towards integrated planning, implementation, and reporting is underway but needs to move much faster.

#### 4.3 trillion

flows by 2030 to achieve a 1.5°C global climate scenario and mitigate the worst impacts of climate change

When acting in silos...

#### 80 million

**jobs** are put at risk with a shift to a low-carbon and resource efficient economy without a just transition

#### 84 million

more people at risk of hunger by 2050 without SDG integration in climate efforts

# The Evidence

Pursuing the 2030 Agenda and the Paris Agreement in concert can significantly and efficiently advance both agendas.

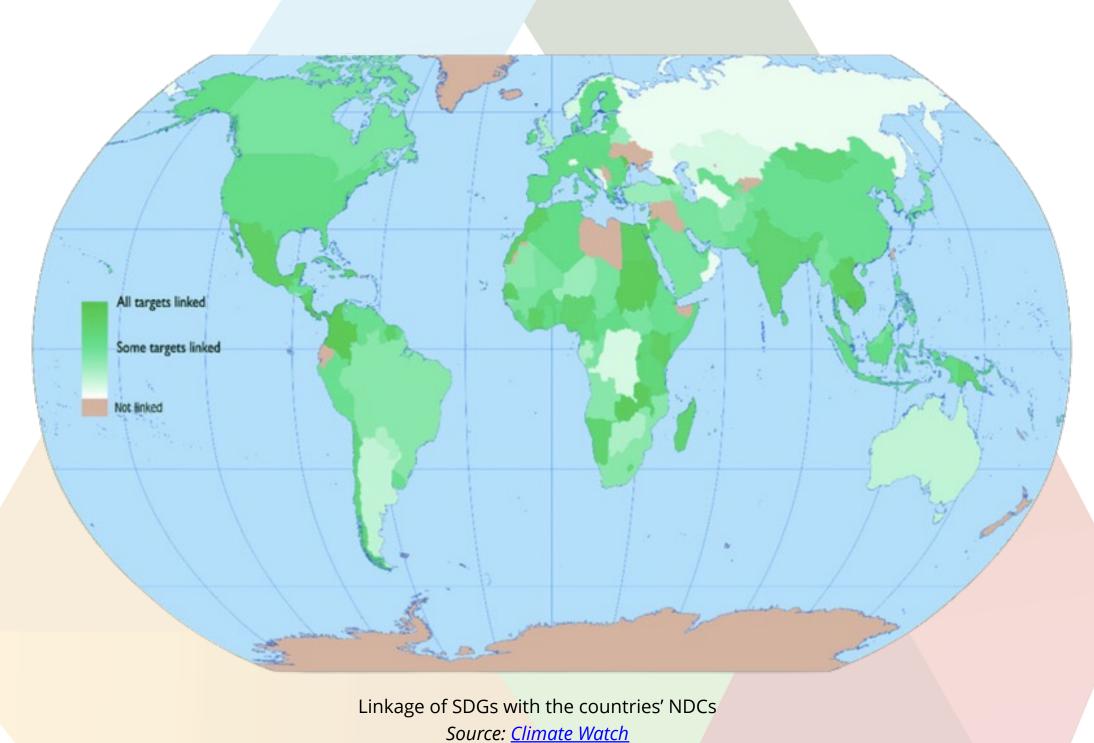

# The evidence indicates strong synergies

Evidence shows synergies between climate action and 80% of 2030 Agenda targets.

Significant overlaps found between NDC climate activities and SDGs 2, 6, 7, 9, 11, 13, 15, and 17.

Overlaps between SDGs and NDC climate activities are more pronounced for low-income and lower-middle-income countries.

Examples of synergistic European Union policy action Energy-efficiency measures **O** Germany and SDG 1, 3, 7, 8, 9, Hungary 11, 12, 13 **Energy-efficient** buildings **O** United Kingdom SDG 1, 3, 7, 8, Family doctors 11, 12 prescribe house insulation for better living O USA, Turkey, SDG 3, 8, 11 Pakistan Germany, India, Kenya China, and Brazil Air pollution control measures Blue carbon Leadership in projects SDG 3, 7, 11, 13 Southeast Asia Energy and Environmental SDG 1, 6, 8, 10, Forest carbon Design 13, 15 projects SDG 3, 7, 11, 13 **O** Casamance Tanzania, Ethiopia, SDG 2, 6, 13, 15 Natural Malawi **Subregion** Women's **9** 93 Global South New Zealand Countries Access to clean empowerment: cooking solutions Women's **Model** improving resilience, entrepreneurship income, and food Communities SDG 3, 5, 7 and climate security Programme leadership at the O Cairo, Lagos, SDG 1, 2, 5, 10, 12, SDG 3 local level for clean Johannesburg, 13, 15 energy transition Accra \$\inspec\$ SDG 1, 5, 7, 8, 10, Air pollution 12, 13 control measures SDG 3, 8, 13

# The Opportunity

Co-benefits of synergistic action significantly outweighs trade-offs. Their evaluation is key for cost-effectiveness and a just and equitable transition.

# Synergistic action will help to course correct

Reduce financial gaps: Pursuing development and climate targets together reduces investment gaps.

Achieve targets faster: Integrating social dimensions enhances chances of reaching climate targets.

Facilitate long-term vision: Synergistic Co-benefits balance short- and long-term gains, gaining stakeholder support.

Ensure just transition: Synergistic planning will ensure a just transition and limit the trade-offs of climate action.

70%
of SDG targets
are attainable with
climate adaptation
measures focused
on co-benefits

green economy

When acting in synergy...

43 trillion

**USD** can be gained in economic output by 2070 when aligning climate and SDG actions

24 million

new jobs created

by 2030 through renewable energy co-benefits through transitioning to a

40%

of global population could meet WHO air quality standards with strict air pollution and GHG mitigation measure

of global po could meet y quality stand

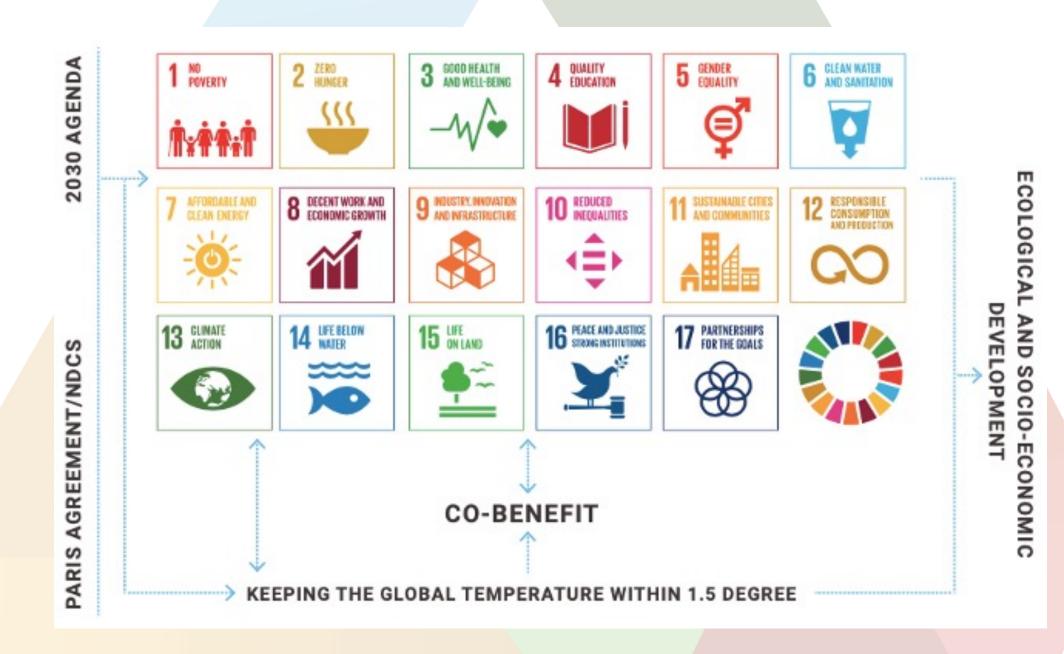

# Overcoming existing barriers towards integrated solutions

Easier knowledge access: addressing the sizable disconnect between scientific evidence and applied policy action.

Improved political planning and reporting: offering a framework for coordination and reporting across agencies on synergistic action.

Adequate financial mechanisms: promoting strategies for synergistic climate and SDG investment, particularly for low, lower middle-, and middle-income countries with deeper cobenefits.

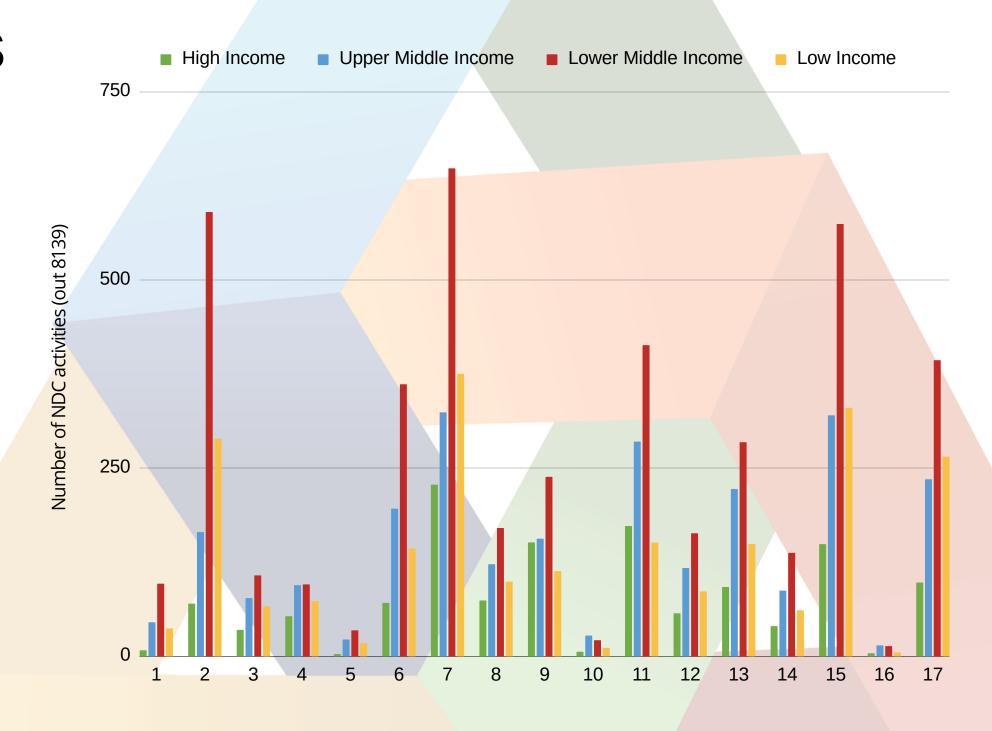

# Context-specific analysis will maximize co-benefits

North and South: Low-income and lower-middle-income countries experience stronger interlinkages, as SDG progress and financing challenges outweigh climate change impacts.

**Urban settings**: Cities present a major opportunities for addressing climate and development challenges in synergy, as the global urban population is projected to reach 70% by 2050.

Tailored financial mechanisms: Measures like encouraging MDBs and IFIs to introduce synergy-enhancing instruments can reduce the existing investment gaps in climate and development sectors.

Number of climate activities that correspond to each of the 17 SDGs across different regions.

# Key Recommendations

Integrated climate and development action offers a vital opportunity for the course correction, addressing challenges and leveraging opportunities.

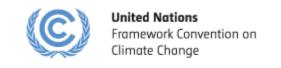

#### Ten Recommendations

- **Enhance** collective resilience against current and future global crises.
- O2 Strengthen science-policy-society interaction to advance synergistic action.
- Promote institutional capacity building and cross-sectoral and international and national collaboration.
- Ensure policy coherence and coordination among policy makers across sectors and departments.

- Develop a 'framework for action' that can help decision makers in public, private, and civil society sectors identify synergistic action for systems change.
- Use the 'framework for action' and to other means to ensure a just transition.
- Address the large investment gaps in the climate and development agendas to enhance the necessary synergies.

- Utilize COP 28 in Dubai to initiate and accelerate synergistic action on climate and SDGs.
- Prioritize the role of synergies in the work of the UN and international financial institutions, including an improved system for sharing information to help countries in their reporting responsibilities.
- Treat cities, sites of major population growth and expansion of economic activities, as an opportunity for focusing on climate and development synergies.

Towards 2<sup>nd</sup> Edition of the Report

### Enhanced structure: Expanding network of partners

#### **CO-CONVENERS**

- United Nations
   Department of
   Economic and Social
   Affairs (UN DESA)
- United Nations
   Framework
   Convention on
   Climate Change
   (UNFCCC)

Coordination and secretariat

#### **EXPERT GROUP**

- Co-leads
- Members
- Technical support team

Independent group of experts leading the drafting process

#### **ADVISORY GROUP**

- UN agencies
- Multilateral Development Banks
- Multi-stakeholder organizations

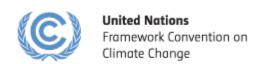

Substantial, contextspecific advice to the Expert Group

### COLLABORATIVE PARTNERS

- Strategic partners
- Funding partners

Technical and strategic support

### Moving forward – Proposed working model

Overarching support and coordination for report delivery Co-Conveners

#### **Expert Group**

main authors of the report

Task Force I – DATA and KNOWLEDGE

Task Force II - POLICY

Task Force III - FINANCE

Task Force IV - SOCIETY

#### Composition and arrangement of each group:

- Leads: experts and lead drafting force, contributing independently to the report findings.
- Co-leads: experts on particular focus area contributing independently to the report findings.
- Technical support team: supporting each group in analysis, drafting, copyediting and other similar tasks.

#### **Advisory Group**

substantial advice to the work of each task force

### Collaborative Partners

technical support to the work of each task force

### Second Report – Substantive Themes and Focus

#### **Synthesis Report**

covering all 4 thematic areas with evidence and deep analysis, providing conclusions and recommendations to be submitted to the political processes of 2024

#### MEASURES FOR SYNERGISTIC ACTION - KNOWLEDGE AND DATA

#### **Thematic Report**

- 1. Background paper for online consultation
- 2. Online consultation

#### POLICY FRAMEWORK FOR SYNERGISTIC ACTION

#### **Thematic Report**

- 1. Background paper for online consultation
- 2. Online consultation

#### CITIES PLATFORMS FOR SYNERGISTIC ACTION

#### **Thematic Report**

- 1. Background paper for online consultation
- 2. Online consultation

#### NEW FINANCIAL SYSTEM FOR SYNERGISTIC ACTION

#### **Thematic Report**

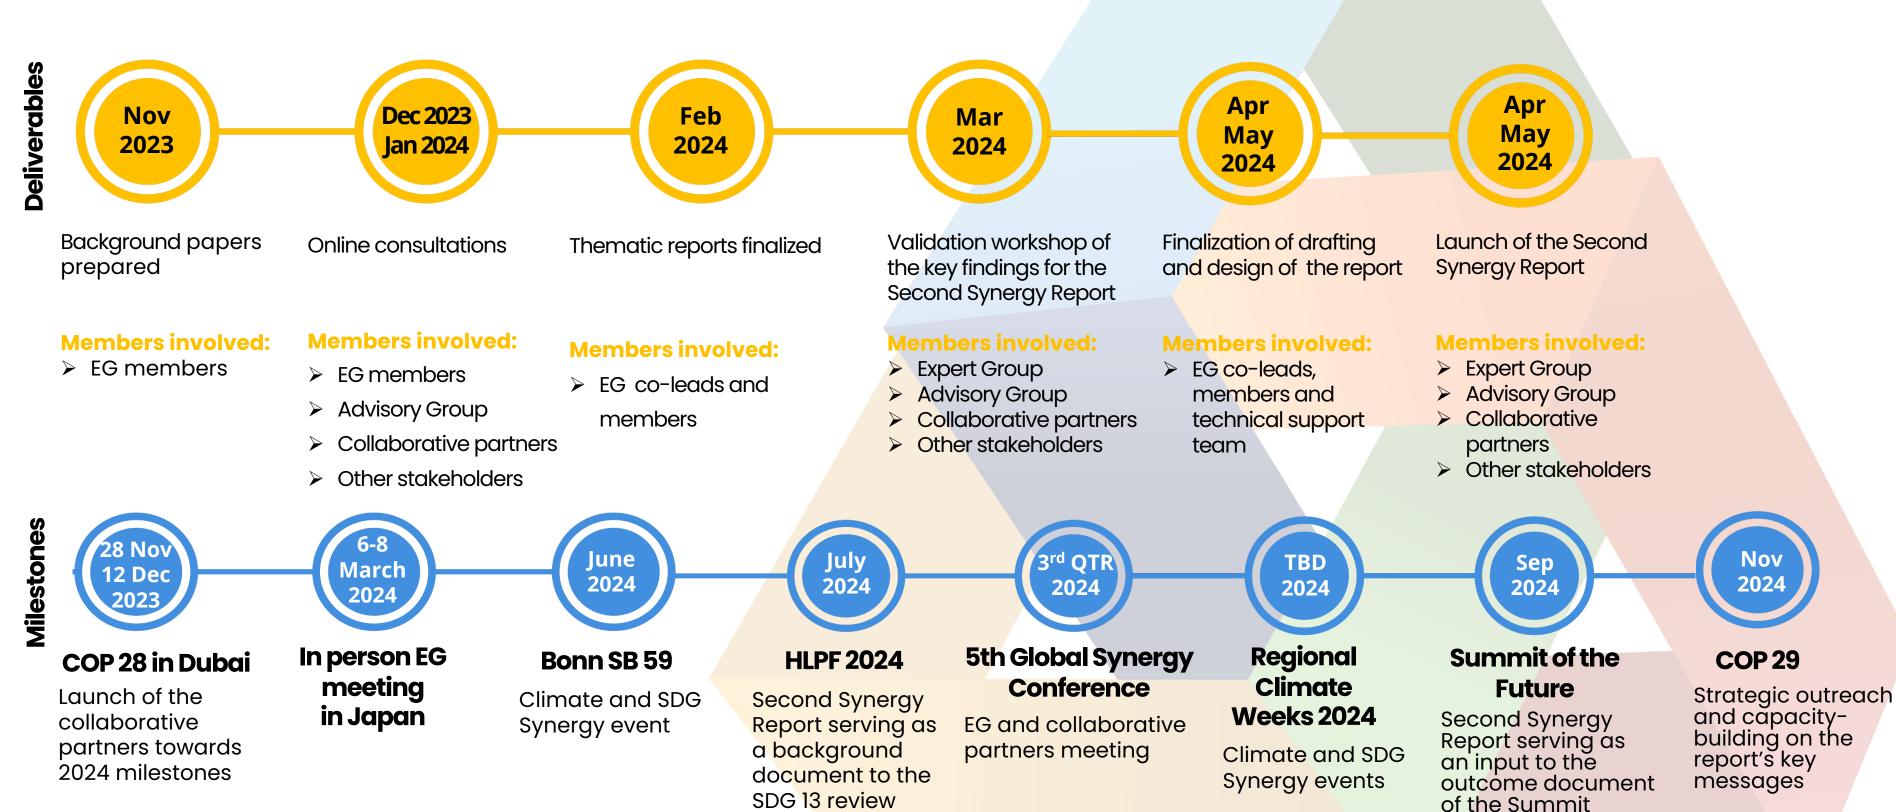

- 1. Background paper for online consultation
- 2. Online consultation

Deep-dive theme

### Deliverables and Milestones (2023-2024)

#### Annex I: Roles and contributions

#### **Co-conveners**

- Coordination of activities
- Secretariat support

#### **Expert Group**

- Research and analysis
- Drafting of report
- Leading the consultations

#### **Advisory Group**

- Peer-review of the report messages
- Input to the report with case studies and context-specific knowledge/data

#### **Collaborative Partners**

- Financial support
- Technical support
- Knowledge and data support
- Communications support
