

## **Votualevu College Juncao Technology Demonstration Base - Field**

### **Visit Site 3**

Since 2020, Votualevu College has been planting Juncao grass and Juncao mushrooms indoors and outdoors. It also uses Juncao mushroom spent residue to make manure and organic fertilizer. In 2023, under the guidance of Juncao technical expert, Votualevu College is able to produce the Juncao mushroom substrate bags by itself. In June, Mr. Rajesh Chand, Principal of Votualevu College, and Mr. Praveen Chand, Master of Votualevu College, were invited to the training course on Juncao technology in China National Engineering Research Center of Juncao Technology of Fujian Agriculture and Forestry University. In September, three people from Votualevu College were selected to attend the training course in China. Students from Votualevu College also came to China for internship.
