

Double Tree Resort Juncao Technology Demonstration Base

- Field Visit Site 6

Double Tree Resort is located 14.5 KM away from Nadi Town, towards Suva, 2.5 KM from the main highway (Queens Road) towards the sea side. The property is owned by the Vision Group. There are part of the property (land) is at the mainland and the rest is the Island, which crossed over by boat.

In July 2023, Mr. Peni Makuwaki Tikoiviwa, Manager of Double Tree Resort came to the China-Fiji Juncao Technology Demonstration Center looking for forage for horses. After learning about Juncao technology, he also knows that Juncao grass can also be applied to address land salinization. Since then, Juncao grass has been planted in Double Tree Resort as forage for horses as well as the salty land to improve the soil.

A development plan has been formulated for the application of Juncao technology by the Double Tree Resort Juncao Technology Demonstration Base. Firstly, it will expand the Juncao grass plantation on the salty land to address salinization and improve soil. Secondly, it will expand the Juncao grass plantation to provide high-quality feed for horses. Thirdly, it will plant purple Juncao grass to beautify the environment. Fourthly, it will plant Juncao mushroom to supply hotels and restaurants, provide healthy food, and sell high-quality Juncao mushroom to tourists.
