Participation is required, participation is anonymous

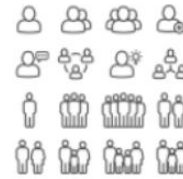

Why M&E in STI Policy is difficult

**complex cause -
effect relationship**

Multiple goals

**Variety of agents,
interactions**

**Unclear assumptions
about innovation models**

M&E

- simple cost-benefit ratio of individual measures does not deliver
- more instruments to assess and stakeholders to inform
- Real risk of under-evaluation
- tension complexity / system vs. (simple) accountability

Practical Challenges in STI Policy M&E

- **Data Availability and Quality:**
 - Addressing data gaps, inconsistencies, and the need for specialized STI indicators.
- **Capacity Limitations:**
 - Addressing M&E capacity constraints within government and research institutions.
- **Stakeholder Engagement:**
 - Ensuring effective stakeholder participation in the M&E process.

Thank you
