DTI, DENR align policies for stricter environmental standards and modern technologies in steel industry

YOU ARE HERE: [Home](#) / [Archives](#) / [Archived News](#) / DTI, DENR align policies for stricter environmental standards and modern technologies in steel industry

QUEZON CITY – The Department of Trade and Industry (DTI) and Department of Environment and Natural Resources (DENR) are pushing for stricter environmental standards and more modern and cleaner technology in steelmaking industry to ensure manufacturers produce quality and safer steel products as well as encourage industries to be environment-friendly.

During a meeting between DTI Secretary Ramon Lopez and DENR Secretary Roy Cimatu last Monday, the agencies agreed to review existing environmental standards and production technologies used in steelmaking, considering reports that several used induction furnace facilities have been set up, which can be more pollutive and produce inconsistent quality and non-conforming steel products.

BENEFITS OF MSME FORMALIZATION

1. Access to Finance
2. Market Access
3. Legal Protection
4. Compliance and Standards
5. Disaster Resilience
