

CITY OF UMHLATHUZE

SDG VOLUNTARY LOCAL REVIEW (VLR) : POST VLR SDG PLANNING

City of uMhlathuze VLR Baseline Report

Lessons and Recommendations

- Focus on the impact of the work completed
- Ongoing challenges in local government; if one SDG is not “performing” there are 16 others that are interlinked (Stewardship example) – SDGs are interrelated and mutually enforce each other
- Simplify the process
- Baseline Report and VLR is not perfect from the start – it is Work in Progress (WIP). Process is not static and regulated - it is voluntary
- Review process as new information comes available e.g. data
- Value in Council resolution
- Increased awareness and exposure of SDGs and related projects - SDBIP reporting; Prioritisation consideration.
- Urgency to address problems and fix delays
- Opportunity to improve M&E
- Change how we handle data e.g. reporting on alternative energy sources

THANK YOU
