Background

- Founded in 2011, Deqing Geospatial Information Town (Zhejiang Provincial Geospatial Information Industrial Park) has become an important geospatial information characteristic industrial park with the highest concentration of geospatial information-related enterprises in China after more than ten years of development. In particular, with the successful holding of the first United Nations World Geospatial Information Congress in 2018 and the official settlement of the United Nations Global Geospatial Information Knowledge and Innovation Center in 2022, Deqing has also become the most internationally influential geospatial information industry cluster.

Background

- Deqing Geospatial Information Town

Background

- In August 2024, in order to 1) promote the internationalization of Deqing's geospatial information industry, 2) share the development achievements of China's geospatial information industry with other countries in the world and 3) engage in business cooperation in the geospatial information related industries, under the strong promotion of the Deqing County Government, it was determined to set up the "World Geospatial Information Home" (WGIH) in Deqing Geospatial Information Town, so as to attract geospatial information-related associations, societies and other institutions from all over the world to set up representative offices in Deqing Geospatial Information Town.

Background

- In October 2024, the "World Geospatial Information Home" as well as the representative offices of Licensed Surveyors Association of Ghana (LiSAG) and Northern Surveyors Forum, Nigeria (NSF) were officially announced at the first United Nations Geospatial Information Week (UN-GEONOW).

Background

- Since January 2025, "World Geospatial Information Home" has been in operation while under construction.
- On 30 May, 2025, "World Geospatial Information Home" was officially unveiled.

Mission/Vision/Main objectives/Strategy

- Mission: An important platform dedicated to business and technology cooperation in the geospatial information and related industries.
- Vision: Attracting around 50 goespatial related associations from various countries to setup their representative offices within 5 years.

Mission/Vision/Main objectives/Strategy

- Main objectives:
 - Building Cooperation Platforms
 - Exhibiting Scientific and Technological Achievements
 - Strengthening Capacity Building
 - Promoting Enterprise Incubation
 - Establishing Overseas Bases
 - Fostering Cultural Exchange

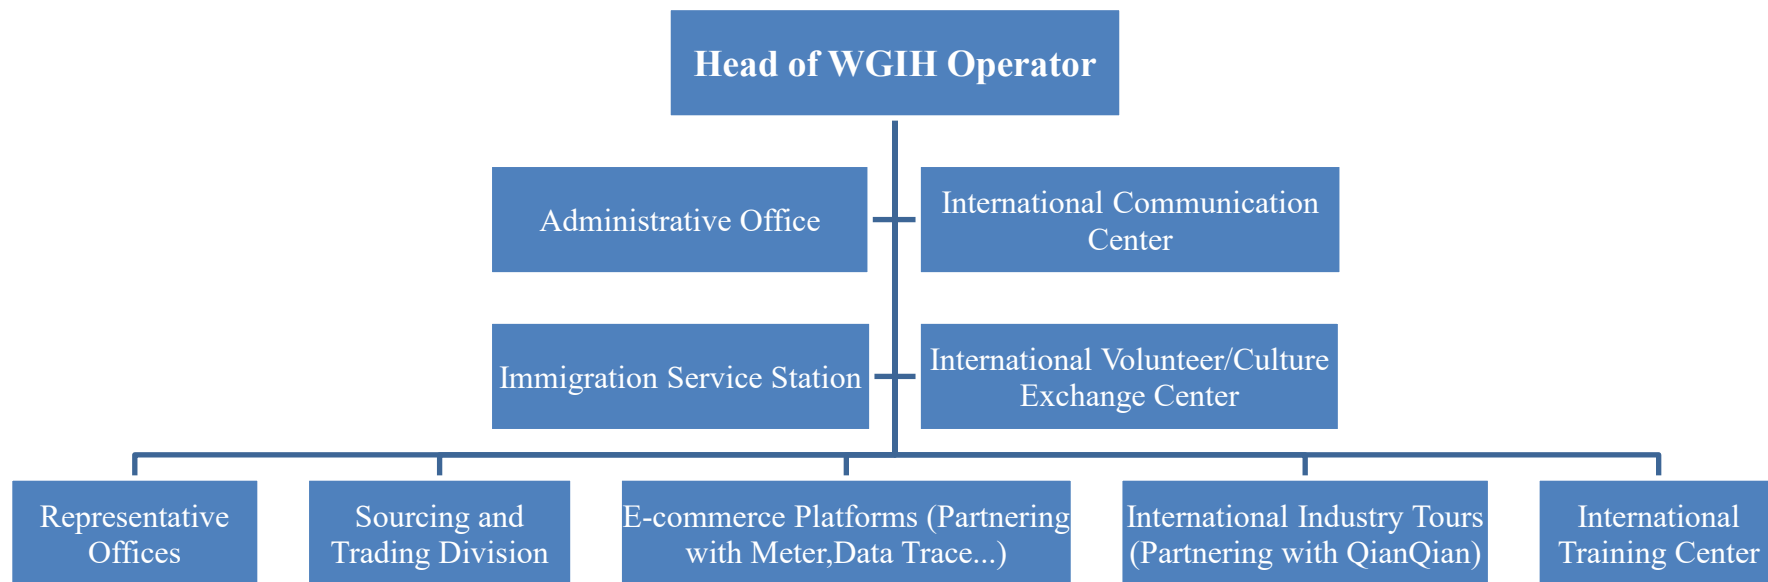

Mission/Vision/Main objectives/Strategy

- Strategy
 - To sign MoU between Deqing Association for Geospatial Information Professionals and geospatial related associations or platforms from various countries.
 - Each association nominates a staff member or an employee of its member (generally top company) as a representative of this association to work in WGHIH.
 - The representative will sign an employment agreement with the operator of WGHIH for work permit.
 - The local government and the operator will jointly sponsor the representative to work in Deqing, such as accommodation and related expenses.
 - For any business, all related shareholders will share the profit, with annual review.
