

Annex

Global Sustainable Development Report: scope, frequency, methodology and relationship with the Sustainable Development Goals progress report

We, the Ministers and high representatives, having met at United Nations Headquarters in New York,

Scope

Recalling paragraph 83 of the 2030 Agenda for Sustainable Development,

1. *Stress* that the Global Sustainable Development Report is one important component of the follow-up and review process for the 2030 Agenda for Sustainable Development;

2. *Also stress* that the Global Sustainable Development Report will inform the high-level political forum, and shall strengthen the science-policy interface and provide a strong evidence-based instrument to support policymakers in promoting poverty eradication and sustainable development. It will be available for a wide range of stakeholders, including business and civil society as well as the wider public;

3. *Resolve* that the Report should incorporate scientific evidence in a multidisciplinary manner, considering all three dimensions of sustainable development, in order to reflect the universal, indivisible and integrated nature of the 2030 Agenda. With its universal scope, the Report should also consider the regional dimension, as well as countries in special situations. The Report will provide guidance on the state of global sustainable development from a scientific perspective, which will help address the implementation of the 2030 Agenda, provide lessons learned, while focusing on challenges, address new and emerging issues and highlight emerging trends and actions. The Report should also focus on an integrated approach and examine policy options with a view to sustaining the balance between the three dimensions of sustainable development. These policy options should be in line with the 2030 Agenda to inform its implementation;

Frequency

4. *Resolve* that a comprehensive, in-depth Report will be produced every four years to inform the high-level political forum convened under the auspices of the General Assembly;

5. *Also resolve* that each year, in order to strengthen the science-policy interface at the high-level political forum convened under the auspices of the Economic and Social Council, scientists who work on the Report could be invited to provide scientific input into the discussion, including on the theme of the forum;

Methodology

6. *Stress* that the main principles guiding the methodology of the Report should be objectivity, independence, transparency, inclusiveness, diversity, scientific excellence and integrity, and policy relevance. The Report represents the result of an ongoing dialogue among scientists in all relevant fields on sustainable

development worldwide, ensuring geographically balanced participation and assessing existing assessments, including the relevant reports on sustainable development from a variety of sources, including the United Nations system, as well as bringing together dispersed information;

7. *Request*, therefore, the creation of an independent group of scientists to draft the quadrennial Global Sustainable Development Report. The independent group of scientists is to comprise 15 experts representing a variety of backgrounds, scientific disciplines and institutions, ensuring geographical and gender balance. The group will be appointed for each Global Sustainable Development Report by the Secretary-General in open, transparent and inclusive consultations with Member States, including the possibility of taking nominations from Member States. The group will commence its work by the end of 2016. It will be supported by a task team, co-chaired by one representative each of the United Nations Secretariat, the United Nations Educational, Scientific and Cultural Organization, the United Nations Environment Programme, the United Nations Development Programme, the United Nations Conference on Trade and Development and the World Bank, with the logistical support of the United Nations Secretariat. The task team will coordinate inputs from a network of existing networks, representing the United Nations, the private sector, civil society and academia. Inputs can also be posted onto the high-level political forum online platform annually;

Relationship with the Sustainable Development Goals progress report

8. *Acknowledge* the distinct but complementary nature of the Sustainable Development Goals progress report and the Global Sustainable Development Report, both contributing to the high-level political forum from different perspectives. The high-level political forum will be informed by the annual Sustainable Development Goals progress report, which is to be prepared by the Secretary-General in cooperation with the United Nations system, on the basis of the global indicator framework, data produced by national statistical systems and information collected at the regional level. The Global Sustainable Development Report will be more scientific and analytical, focused on the science-policy interface, and will also inform the high-level political forum.
