

Initiative	Pollution Control and Water Quality
List of actions	1) Encourage (and commit) to scaling up wastewater treatment and pollution control in order to safeguard water quality.
Champion/supporter (TBD)	Bangladesh, Mauritius
Relevant events	World Water Day (Mar 2017), New York (post-UNGA) (Sept. 2017)
Scenario roadmap	<p>Statements: Water is an integral part of the environment. Pollution of water impacts not only the water resources systems but also the whole ecosystem and physical environment as well. Rapid economic development, industrialization, modern agriculture practices and large number of population have been creating pressure on environment, especially on water-bodies. (to be expanded)</p> <p>Financing: Direct Govt. finance (projects/ programs), Public-Private Partnership (PPP), ODA (where necessary), Soft loans from the multinational banks/ financial institutions (to be expanded)</p> <p>Lighthouse initiatives: In Bangladesh we have some examples particularly on the tannery relocation from capital city. (to be expanded, including how other nations may learn from this)</p>
