

A capacity development workshop: Accelerating national implementation of the 2030 Agenda

9-10 April 2019

UNHQ

CONFERENCE ROOM 6

Introduction

The 2030 Agenda and the sustainable development goals (SDGs) constitute a comprehensive plan of action to eradicate poverty and ensure sustainable development. Referring to action at the national level, the 2030 Agenda provides as follows: “We encourage all member states to develop as soon as practicable ambitious national responses to the overall implementation of this Agenda. These can support the transition to the SDGs and build on existing planning instruments, such as national development and sustainable development strategies, as appropriate.”¹

Countries have identified a range of concrete capacity development needs for SDG implementation.² Many countries are unable to follow-up on the gaps and challenges identified to implement the 2030 Agenda due to factors such as human and resource constraints, poor means of implementation, weak strategic planning and inadequate multi-sector and multi-ministerial coordination. The reported needs are generally related to the following areas:

- Strengthening systems of data collection and analysis and statistics;
- Mainstreaming the SDGs in national development plans, sub-national and sectoral plans;
- Strengthening institutional capacity and ensuring proper coordination between national, sub-national and local levels of government;
- Enhancing Institutional arrangements and coordination;
- Strengthening stakeholder engagement;
- Creating effective national monitoring and evaluation systems;
- Strengthening means of implementation: cost evaluations, budgeting and resource mobilization; and
- SDG specific technical support.

Objective

The objective of the workshop will be to utilize peer-learning to foster implementation of the 2030 Agenda, drawing on issues identified in the course of its implementation. DESA’s experience with peer-learning workshops has demonstrated the value of this approach. The workshop seeks to support countries in building coherent policies for sustainable development, integrating good practices, lessons learned and recommendations from other countries for implementation of the 2030 Agenda. The focus is on building capacity to identify and translate the gaps, challenges and recommendations identified at the country level into actionable and effective solutions for the implementation of the 2030 Agenda.

The workshop aims at providing government officials with strategies and tools to advance implementation the SDGs, through peer learning regarding commonalities and specificities regarding

¹ Para. 78.

² See e.g., DESA, [Synthesis of Voluntary National Reviews 2018](#) (2018).

challenges, lessons learned and good practices and identifying the additional support needed by these countries.

The workshop will also explore how the United Nations system and development partners can better support follow-up actions to national review processes.³

The workshop will be interactive in nature, designed to foster exchange of ideas. A sharpened focus will be on capacity development needs related to: (a) strengthening stakeholder engagement; (b) data and statistics; (c) financing, cost assessments and budgeting; and (d) leaving no one behind.

Participants

Participants will be mainly government officials from capitals engaged in national implementation of the 2030 Agenda and the SDGs. The workshop will also bring together some United Nations, representatives from Country Teams, Regional Commissions, and development partners to discuss how to better support national level follow-up actions and implementation of the 2030 Agenda.
