## Invitation

### United Nations Forum on Climate Change Mitigation, Fuel Economy and Sustainable Development of Urban Transport

16-17 March 2010

Korea Press Center, Seoul, Republic of Korea

The transport sector is emerging as the fastest growing source of energy-related greenhouse gas (GHG) emissions, accounting for more than 23 per cent of those emissions in 2006. Road transport accounts for three-quarters of all transport GHG emissions. The continuing expansion of motor vehicle use also causes other emissions harmful to human health, including lead, total suspended particulates, nitrogen oxides, ground level ozone, carbon monoxide and volatile organic compounds.

Against this backdrop, the United Nations Department of Economic and Social Affairs (UNDESA) and the Korea Energy Economics Institute (KEEI) are co-organizing an expert-level *UN Forum on Climate Change Mitigation, Fuel Economy and Sustainable Development of Urban Transport* which seeks to provide a platform for wider information and experience sharing, in particular for the benefit of experts from developing countries. With support provided by the Ministry of Knowledge Economy (MKE), and the Korean Energy Management Corporation (KEMCO), the meeting will bring together government officials, and experts on transport, the environment and related subjects, as well as representatives of international organizations, financial institutions, industry, academia and other stakeholders.

The technical presentations discussed at the Forum will provide background information for the eighteenth session of the Commission on Sustainable Development (CSD), to be held in New York in May 2010.

We look forward to welcoming you in Seoul.

Mr. Sha Zukang  
Under-Secretary-General for Economic  
and Social Affairs

Mr. BANG Ki-Yual  
President  
Korean Energy Economics Institute
