

## **SANITATION**

- 1.) We support the statement by Ghana on behalf of Africa and Jamaica on behalf of G77 and China.
- 2.) We do support the issues identified in the matrix and those mentioned by various speakers before us.

### **Six key areas need to be emphasized in this regard.**

- 1.) Support in structural reforms order to provide an institutional home to sanitation, like Senegal has been able to achieve by now having a stand alone Ministry responsible for sanitation
- 2.) South-South sharing of information and experience
- 3.) Financial Support through achieving the ODA target in order to address poverty which force poor people to live in filthy environments
- 4.) Continuous awareness and advocacy.
- 5.) Capacity building and Technology transfer in the context North-South Cooperation
- 6.) International support in the area of Waste-water treatment technology transfer capacity building and financing to go beyond the traditional biological treatment by using oxidation ponds which does not allow re-use
