

STATEMENT BY
Dr. CHHUN Vannak, Senior Minister's Advisor & Deputy Director General for Inspection,
Head of Cambodia's Delegation to the CSD IMP of 19th Session
New York, 3 March 2011,
10 Year Framework Programme of Sustainable Consumption and Production
SCP 10 YFP
10:00-2:00PM

Cambodia:

We greatly thank Mr. Chair of the CSD-19 and Mr. Tariq Banuri from Panama to the IMP for pushing the SCP policy and actions of the 10 Year Framework, and thank the panelists for their concise information, and we join the statement of the G-77.

The 10 YFP for SCP should include: sustainable clean industrial production from its green processing to value chain; upscale clean industrialization through clean production centers. We support UNIDO for the clean production processing and we urge engaging multistakeholder partnerships in the SCP;

The 10 YFP should also increase market value for green and environmentally friendly products. A decoupling process for production and green growth initiatives for the SCP are to be included.

Senior Minister and Minister of Environment of Cambodia, H.E. Dr. MOK Mareth, has taken green actions by developing a national green growth road map and through a bilateral and multilateral cooperation on green growth initiatives, like the one with South Korea.

The 10 YFP should also include balanced consumption and production, for a sustainable lifestyle in harmony with nature by achieving more with less; coherently coordinated institutional arrangement with good SCP governance structure and a SCP trust fund are needed.

The 10 YFP should also stress mainstreaming SCP into national development plans through the SCP law and policy at the national level. Finally, financial assistance (as not included in the UN DESA's SCP Report E/CN/17/2011/8 in page 11) and technical assistance, including capacity building, clean production techniques, knowledge and clean technology transfer, to the developing countries (DVCs) and the less developed countries (LDCs) are to be included in the 10 YFP. Better pricing of primary commodity and resources from the DVCs and LDCs in the global resource market are to be enhanced.

Thank you very much, Mr. Chairman.
