Hametner: Use of SD indicators in the region: status, results

Institute for Managing Sustainability W/Wirtschaftsuniversität Wien Vienna University of Economics and Business

Indicators are an integral part of SD policy processes (1)

- Agenda 21 (para 40):
 - Development of indicators of sustainable development
 - Promotion of global use of indicators of sustainable development

• Rio+20 – The future we want:

- Para 85I: "[The HLPF should] Enhance evidence-based decisionmaking at all levels and contribute to strengthening ongoing capacitybuilding for data collection and analysis in developing countries."
- Para 98: "... recognize that integrated social, economic and environmental data and information, as well as effective analysis and assessment of implementation, are important in decision-making processes"
- Para 250 (SDGs): "... recognize that progress towards the achievement of the goals needs to be assessed and accompanied by targets and indicators, while taking into account different national circumstances, capacities and levels of development."

Institute for Managing Sustainability W/Wirtschaftsuniversität Wien Vienna University of Economics and Business Indicators are an Applied research & studies Doolicy processes (2) Ex-post assessments: evaluations, audits, ex-post **SEAs SDI** Monitoring 5. Renew political comittment and guidance **1. Provide political** comittment and guidance Peer 2. Specify goals r<mark>eview</mark>s Long-term focus 4. Implement **Policy integration** policies Participation Reflexivity 3. Design policies **SDI** Monitoring Ex-ante assessments: SEAs, SIAs, CBAs

Indicators are an integral part of SD policy processes (3)

- Many European countries have adopted NSDSs and accompanying SD indicator sets ...
 - **EU:** Most EU countries + EU itself
 - **Non-EU countries:** Iceland, Montenegro, Norway, Serbia, Switzerland
 - Supra-national: Nordic region (new SDS + indicators since August 2013), Mediterranean SD strategy + indicators ("plan bleu")
- ... but these SDI sets differ in size, responsibilities and regularity of monitoring activities
 - ranging from 15 key indicators (e.g. France) to 155 indicators (e.g. Hungary), with an average of 80 indicators
 - In most countries the **national statistical offices** are responsible for the development and monitoring of SD indicators
 - Only a few countries do monitor progress regularly (e.g. Austria, Switzerland, also EU)

Most recent results for Mediterranean countries:

Employment rate (% of population aged 20-64), 2012

Most recent results for Mediterranean countries:

Risk of poverty or social exclusion (% of population), 2011

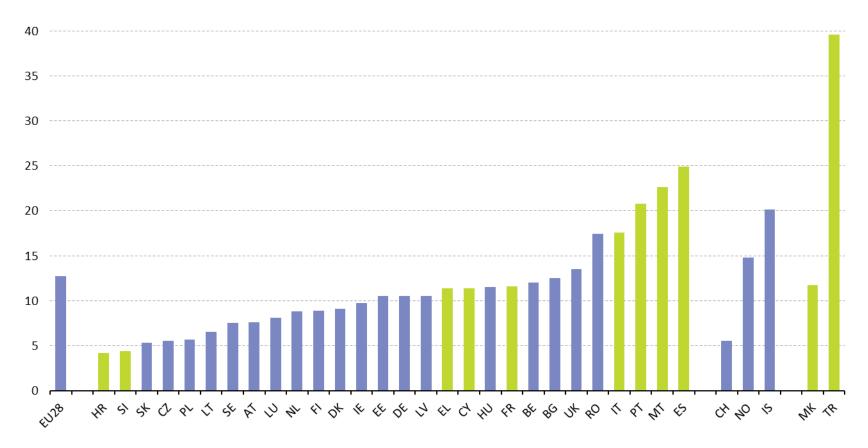

Hametner: Use of SD indicators in the region: status, results

Most recent results for Mediterranean countries:

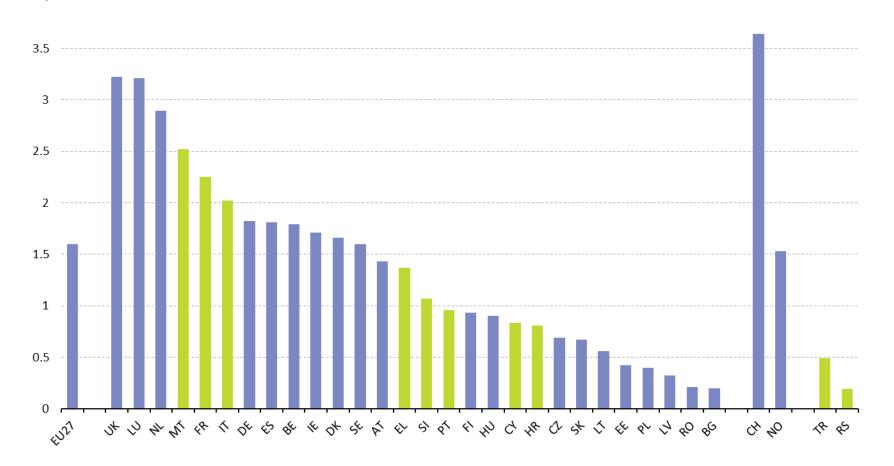

Early leavers from education and training (% of population aged 18-24), 2012

Most recent results for Mediterranean countries:

Resource productivity (EUR/kg), 2011

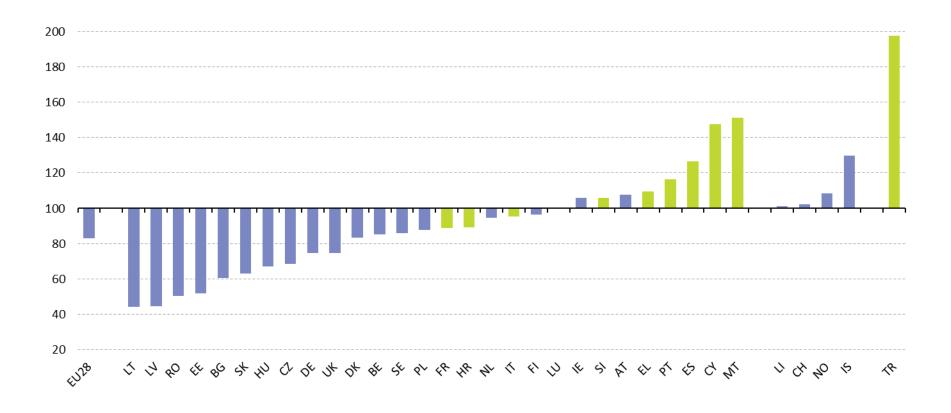

Hametner: Use of SD indicators in the region: status, results

Most recent results for Mediterranean countries:

Greenhouse gas emissions (% change since 1990), 2011

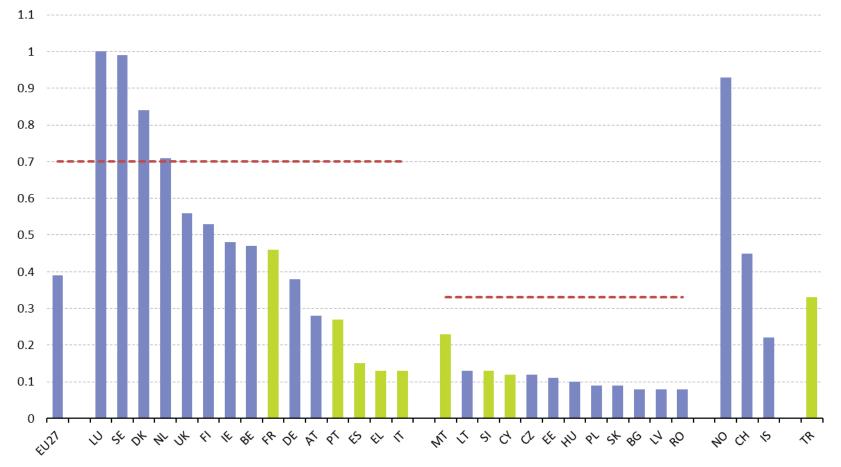

Hametner: Use of SD indicators in the region: status, results

Most recent results for Mediterranean countries:

Official development assistance (% GNI), 2012

Hametner: Use of SD indicators in the region: status, results

Challenges for the use of indicators in the GSDR

• Selection of goals & indicators

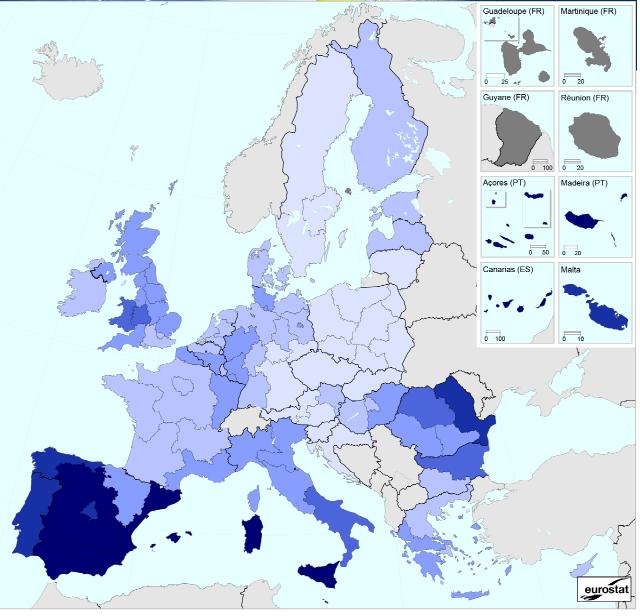

- Top-down vs. bottom-up
- Policy-based vs. model-based
- No. of (headline) indicators
- "Evaluation" of progress
 - Existence of quantitative targets
 - Thresholds
 - Trade-offs between environmental and social trends
- Communication
 - Regular monitoring reports?
 - At which level (global, regional, national, sub-national)?
