Importance of social media

Social media has fundamentally altered the balance of power between governments and civil society.

Evidence: current headlines

There is a need for the UN to open up to civil society.

Sustainable Development and SCP ultimately require the fostering of resilient communities.

Given enormity of effects from climate chaos, there is a profound need for communities to move quickly with creativity, wisdom, and a sense of caring and commitment.

Capacities of resilience – collaboration; communication; connection

Resilient community – creative collaboration

“Leading the global movement
in environmentally sound
health care”

Issues:

Waste management

Green purchasing

Green building and energy

Toxic materials

Collaboration with: health professionals,
community leaders,
businesses,
local authorities
international agencies

Find healthy, green,
ethical products

Get mobile advice while shopping in a store by [downloading our iPhone app](#)

Create and share personalized favorites lists of products that are right for you and your family

Resilient community: Caring and Hope

Voice of African Mothers ; Founder – Nana Fosu-Randall

Wars do not build nations; wars destroy them.
Wars bring unnecessary pain, hunger,
distress, and suffering.

There is an alternative to war;
the promotion of peace, the sharing
of resources and the creation of understanding
among all people.

Resilient community

Capacity to work proactively – Watchtower

Capacity to manage consequences of lack of foresight

Consequences of in utero exposure
to neurodevelopmental toxicant
